Strategy guides are manuals and secondary canonical sources for both Daxter and Daxter games. All games, except Daxter, had at least one strategy guide released as accompanying material by the publisher, officially licensed by Sony Interactive Entertainment, and in some cases for the contribution or collaboration of Naughty Dog or High Impact Games. Three strategic guides for The Precursor Legacy have been published, including one for North America and two for Japan. As II also published three strategic guides, including one for North America, one for Europe and one for Japan. Like 3, Like X: Combat Racing and The Lost Frontier later had only one strategic guide, each for North America (though Like 3 also covered Europe). In North America and Europe, publishers of strategic series guides differed between Prima, BradyGames and Piggyback. In Japan, all of only one has been published by Famitsu, the other is published by Shogakukan. Precursor Legacy (Prima) Strategy Guide[edit | source] Prima Games, Random House, Inc. Originally released on December 11, 2001, the second edition was released to accompany the greatest hits release of The Precursor Legacy on October 22, 2002. It was part of prima's official Series of Strategic Guides[1] before it came out of print at the end of 2004 and had no stock. After publication, it was also introduced into the Library of Congress. Format and graphics [edit | sources] The strategy guide is by Daxter, with Dave Winding, and as such tells Daxter. The dialogue is original to Dave Winding, however, and not written by writers in Naughty Dog. The book is chronicled with sticky notes and comment listicles by Daxter, and is illustrated with in-game screenshots along the way, as well as decorative renders on the margins. The book begins to familiarize the reader with various elements of gameplay, characters, goods and factions in the game. Each hub location contains brief descriptions of the new characters. Each chapter is preceded by a game map with the appropriate location circled and begins with Sage Advice from Samos Hagai, listing different requirements and requirements, as well as stamped postcards and notes from Daxter. The design and layout is attributed to Tim Lindquist. Different Renders and exclusive graphics are original with Naughty Dog. The cover of the strategy guide uses the same graphic from the front cover of NTSC-U/C's The Precursor Legacy, with a red Prima Official Strategy Guide banner at the top. Advertises All 101 Power Cells Located! front and secret power cell revealed! on the binding. Release and other media[edit | edit source] The Strategy Guide was printed in the United States and distributed in North America (United States and Canada) and the United Kingdom, originally listed at \$14.99, CAD 19.95 and £9.99 respectively. The first edition was released on December 11, 2001, eight days after the North American debut of The Precursor Legacy. The second edition was released on October 22, 2002 to accompany the Greatest Hits edition. The game manual for the NTSC-U/C release of Precursor Legacy advertises a strategy guide, proclaiming: You have a game, now get a guide! Although the strategic guide has been widely distributed in the UK, the release of PAL The Precursor Legacy makes no mention of the strategic guide. The book is one of three strategic guides covering The Precursor Legacy and the only strategy guide in English. There are also two Japanese language strategy guides, Jak and Daxter: Precursor legacy official perfect guide by Shogakukan. All three are in Naughty Dog's As well as Daxter's collection of goods. The book is also one of two Prima Games strategy guides that include the Jak and Daxter series, the second of which is Like X: Combat Racing: Prima Official Game Guide. Originality and Research[edit | editing sources] As a product officially licensed by Sony, published by video game strategy guide printed random house, inc., prima games, the strategic guide is a canonical source of information. The guide especially thanks people from both Naughty Dog and Sony, including those who are accused of canon, namely Dan Arey and Sam Thompson, each of their respective companies. Although Daxter's dialogue is attributed to Winding of Prima Games, an advertisement in the game manual pronounced Daxter's guidance as official. The ad also boasts original, exclusive graphics from Naughty Dog. Format and graphics [edit | editing sources] The Strategy Guide includes graphics similar to the NTSC-J textbook graphics for The Precursor Legacy and promotional renders made available to all Japanese media as well as Daxter. It also has its own original 2D illustrations and overhead 3D level maps. It also provides some screenshots, renders, and cutouts from the manual. Each chapter begins with a full overhead map of the new location, and then includes specific close-ups of some areas throughout the chapter. The guide is chronicled by pop-ups pointing to certain areas and illustrations explaining missions sequentially. Maps also include locations for collectibles such as precursor orbs, power cells, and scout flies. Messages from Samosa itself are also present throughout. The front cover of the strategic guide uses the same render as daxter throwing itself into the air with an energy cell from the front cover of the NTSC-J version of The Precursor Legacy, but placed on a plain orange background. The unknown Jak and Daxter logo with Japanese and English subtitles is located at the top of the book. Release and other media[edit | edit source] The strategy guide has been printed and distributed in Japan. The first edition was released some time in 2001 to accompany the debut of The Precursor Legacy. Each chapter then begins with 3D maps of the main nodes and surrounding areas, and then continues with annotated hints with the following missions. Chapters are illustrated with screenshots of the game, original Japanese promotional renders, and 3D cutouts of characters and other in-game items.
