124 area code canada

There is no area code 124 in North America (USA, Canada, etc.). North American area codes cannot start with '1'. Other countries may have an area code of 124 or similar. The phone country code +1 is North America, but you need the following three digits to further reduce location. For example, +1 240 is in Maryland, but +1 242 is the Bahamas. (The plus sign means enter your international access prefix here. From a GSM phone, you can enter the number in full international format, starting with the plus signal. The most common prefix is 00, but Japan uses 010, Australia uses 0011, and many other countries use different prefixes.) The other day there was a phone call that appeared on the caller's ID with an area code of 124. I've never heard of this area code, and afaiik area codes don't start with 1. The number says so - 1243## - so it's not like it's 1-243 - and then the number because there are only 6 numbers after the 3. It's probably a telemarketer, but I was wondering if anyone saw or heard of something like that. Wow, that's weird. I went www.whitepages.com and did a reverse area code search and it says it doesn't exist. I'd say you're right. Telemarketing. I don't think there's such an area code, because of the 9-1-1. Many company phone systems require you to dial 9 to get an outside line, than add 1 to a long distance call. So if the area code started with the number 1 of you you'd be dialing 9-1-1, it's not good. Did you try calling back? Out of curiosity, I'd have to see how they answer the phone. I got a telemarketing call this morning that came up as 111-111-1111. I think they're using technology to hide the phone number and show it? I've never noticed 124 area codes before. Yes, that's why I like caller ID if I don't recognize the number or name I don't pick it up, unknown numbers get an unknown answer.
