The GreenWorks 25022 12 Amp Corded 20-inch lawn mower is recommended and also an excellent testimonial. Hopefully, this guide will help you find Greenworks Home Depot or Lowes. Greenworks 25022 lawn mower is a very popular and inexpensive corded, walking lawn mower. It is powered by 12 amps, which gives plenty of power A 20-inch cutting stove. Greenworks 25022 lawn mower is versatile, sturdy and durable lawn mower, easy to use and maintain. Updated: November 14, 2019. Greenworks 25022 Lawn mower features and specifications Greenworks 25022 is a powered 12 Amps engine that offers a maximum, no load speed of 3600 rpm. The cutting base is made of steel, which makes this lawn mower strong and durable, although not as light as some users would like. Greenworks 25022 weighs 56 kilograms (~25.4 kg) without power cord. The cutting path is 20 inches (~51 cm) wide, so the user can mow even larger lawns quite quickly. However, Greenworks 25022 is recommended for smaller and medium yards, while larger yards are recommended with lawn mowers with a wider cutting path (for example, 22 inches per 56 cm). The unit rests on two front 7-inch (~17.8 cm) wheels and two 10-inch (~25.4 cm) wheels at the back, which supports mowing well. Greenworks 25022 has 7 cutting heights of 1.5 to 3.75 inches (3.8 to 9.5 cm). The cutting height can be adjusted quickly with the height adjustment lever. Note: Although Greenworks 25022 is easy to assemble, maintain and ultimately use the corded lawn mower on the back, be sure to read the operating instructions carefully. Never forget that there is a fast-rotating cutting blade at the bottom of the lawn mower, which can cause a lot of damage, injury or worse if the lawn mower is not used correctly! Greenworks 25022 is a versatile lawn mower with three functions: mulching, side discharge or rear bag storage. During operation, the device is quite quiet, much quieter than gas-powered lawn mowers. Since it is electric, it does not emit fumes or smoke during mowing - the only smell is actually the smell of cut grass :) When using a lawn mower, always be aware of your surroundings and foot position, extension cord, common yard outings, possible obstacles, other people, but also pets, children, etc. Initially, the Greenworks 25022 uses a fairly simple but powerful combination of power button and warranty switch. In addition, the unit has an automatic circuit breaker that protects both the motor and the supply circuit from overload. Note: If the automatic switch starts popping out, it is not a switch, but there is some kind of problem with the lawn mower - disconnect the extension cord, allow the lawn mower to cool down and check the blade clogging or anything that can cause the motor to over-power. Greenworks 25022 Lawn mower extension cord During operation Greenworks 25022 lawn mower requires up to 12 amps. Like most similar lawnmowers, Greenworks 25022 only has a connector plug that requires users to purchase an extension cord according to individual needs and preferences. When you select extension cord, keep these tips in mind: - the extension cord should be easily visible so bright colors are highly recommended. Greenworks manufactures several hard, excellent extension cords, but IMHO, dark green, is not the best color for corded lawn mower extension wires. - the extension cable must be thick enough. Since Greenworks 25022 requires up to 12 amps, go to a cable that supports at least 15 amps. - the extension cable must be hard, reliable and designed for outdoor use. Of course, the extension cord must be in good condition. Note: never, but never cross the extension cord with the lawn mower on top ... Long Story Short: Greenworks 25022 lawnmower is a simple and reliable lawn mower for small and medium yards. It has plenty of strength to cut even the hardest grass, just make sure the blade is sharp. Since the blade can cause a lot of damage (at the very least), always remember: safety first. After all, better to be safe than sorry. If you are looking for an inexpensive wired lawn mower, consider this model. For more reviews and recommendations, see the greenworks 25022 Lawn Mower Amazon link (the link opens in a new window). We are a subsidiary I hope you love the products I recommend! Just know, some links on this blog are good links, which means I get a small reward. Of course, this isn't extra for you, but it helps me continue to bring you great lawn care product reviews. I really appreciate your support. The Greenworks (25022) wired lawn mower has a 20-inch steel cover and is suitable for small and medium lawns. The lawn mower has a 12-amp electric motor and is capable of collecting, mulch and side discharge cuttings. This Greenworks has 7 cutting heights of 20 inches from 1 1/2 inches to 3 3/4 inches and includes safety features that prevent intentional startups. This lawn mower has larger 10-inch rear wheels to improve stability and a huge 56 lbs. grass collection bag. This is Greenwork's 20-inch wired lawn mower with a large blade and a more powerful motor than its smaller brother (14). The machine sits on a steel deck and has a good selection of cutting heights to choose from. This larger model has few additional features that make it more suitable for larger lawns and more user-friendly than smaller models. Main featuresRating: 9.6/10Lawn Size: Small — Medium power: 12-amp motor cover Size: 20 Inches Cutting height: 7 (1 1/2 inches to 3 3/4 inches)Weight: 56 PoundsDeck SizeGreenwork's robust 20-inch steel cover provides good protection from flying debris and blade. The steel cover adds a reasonable amount of weight to the machine. You should be strong to put this machine on the shelf or even hang it on the wall, so it's probably best to keep it lower in the garage. PowerThe Greenworks 20-Inch 25022 uses powerful ampere electric motor. This is a large engine, it must be the rotation of a longer blade. And strength. Force. through the lawn mower, as long as the blade is kept sharp and free of debris. When it comes to mowing grass through an overgrown lawn or thick elevated ones, this machine is quite capable combined with a wide range of cutting heights. << Check the price now >>BladeA long 20-inch blade covers 8.65 square feet with each pass, which means you need to trace your steps less. The blades are heat treated harder and sharper on the edge of the blade, but they still keep some flexibility to cope with the oddly solid object. The blades are consumable, but you can try sharpening them when the edge of the blade becomes dull. These blades are not expensive to replace and are easy to find. Height adjustment The left rear wheel has one height lever that controls all four wheels. This lever is made of metal, as is the connection terminal, which adjusts the height of the front wheels. The 7-position height gives the wearer good control over uneven areas of the lawn or where there may be flagstones. The lowest height setting is 1 1/2 inches and can go up to a high 3 3/3 inches, suitable for all types of grass. Using the lever on the back of the machine is a much safer way to control the height of the lid. Roller (Tracks)This model doesn't have a roller, but it has a weighted bar that pulls grass to make it a little more uniform. Grass BoxThe Greenworks 20-Inch 25022 lawn mower has a 10-gallon removable grass tolerance bag. This bag needs a sturdy steel frame to help keep the shape of the mesh bag. If you do not want to collect grass, the box must be removed. The lid has a built-in side discharge flap and comes with a removable gutter. Once the side shaft is in, the lawn mower shoots clips on the side of the lawn mower as you walk. MulchingT this is a 3-1 lawnmower, and in addition to being able to collect grass or send it to the side, it also mulch. The device comes with a mulching plug that further chops the clips and scatters them under the lawn mower during the trip. For more information about the mulch benefits of lawn, use my article The benefits of Mulching lawnmowers amp;lt;< Check the price now >>Safety features Starting an electric motor is a small button that needs to be squeezed. This button releases the gas bar lock so that the start cannot occur accidentally. The safety button switches the throttle back on. The motor power cord is double insulated, so it has more protection against abrasion or accidental cut-offs. The lawn mower also has a switch and cord holder to keep the extension cord up and out of the way. Design and Build QualityGreenworks 20-Inch 25022 is a well-built and durable steel cover that can withstand much more punishment than a plastic cover. The engine's from Greenworks. although some owners have noticed problems with overheating. Just make sure you don't set the lawn mower too low on thick long or damp grass, and you shouldn't have any of these problems. Greenworks 20-Inch 25022 Video To get an idea of what this Greenworks lawnmower looks like, watch the video below. The performance 12-amp engine is perfectly adequate for all seasons and lawn conditions, and a larger deck helps to cope with thick grass faster. The machine is heavier because of the steel cover and larger engine, which makes pushing the lawn mower up the hill a little harder, but it's still lighter than a gas-powered lawn mower. Larger rear wheels are a great feature and increase stability and make the lawn mower more maneuverable. << Check the price now >>Green 20-inch 25022 operators ManualClick here to access Greenworks 20-Inch 25022 Operators ManualPros and ConsPros:Large 20 Inch deck/blade. Steel cover. Powerful 12-amp engines.10-inch rear wheels. Mulching property. Rear cover height lever. Wide gas throttle. Side discharge hatch. Minuses: A little heavy. Not self-propelled. Should you buy this model? 25022 is an excellent choice for a small and medium lawn. It is quiet and has enough power and cutting height to cope with most types of grass. It has fantastic 3-in-1 cutting options for disposing of grass, making this lawn mower flexible and adaptable to your needs. Greenworks continues to offer high-quality and innovative gardening tools at a very competitive price for the U.S. market.
