Photo: Pexels/Rawpixels Rock, Paper, Scissors, is simply one of the best games of all time. You can flip a coin, you can draw straws, you can roll the dice, you can do any number of things to choose how something works between people, but there is no better way to do so than to play Rock, Paper, Scissors. Unless you've been living under a rock (did you see what we did there?) you obviously played this game but just for the obvious point, let's break it down. Usually, on the count of three you put your outstretched hand into one of three shapes against the other, and whatever you put down is what wins the game. Rock beats scissors when it breaks them out by hitting them, pulling paper beats, as it cuts through it, and beats paper stones as it sands it down.		
While the game is mostly opportunity, it is not always, because if you play with someone long enough, you start to figure out their scenes. Company Photograph: fotosearch.comS for cutting paper, cardboard, fabrics, chains, price tags, plastic packaging - that list continues — the scissors in your office or kitchen drawers can be the most reliable everyday tool in your home. With such regular use, that reliable tool is dull over time. Most scissors are not prohibitively expensive, so when a pair dulls you might consider just going out and buying another. But of course it is not necessary (not to mention a waste of money) if you how to grind scissors. Basically, scissors are two knives connected at a turning point. So unsurprisingly, you can sharpen the scissors just like you would kitchen knives, with a few simple tools and some practice. Tools & amp; MaterialsPed: fotosearch.comSTEP 1 For the most efficient grinding of scissors, you need a grinding stone (sometimes called a bench stone). You can get one at the hardware store for less than \$20, and it will serve to sharpen most of the blades you have, from your kitchen knife to your trimming. We like Lanksy Puck (see product on Amazon) because of its compact size and user-friendly shape, but you can not go wrong with any quality, stone.han two-sidedlf your scissors are very dull, you will need to start with the rough side and then move to the better side to finish. If your scissors just need a light tune-up, you'll only use the better side. Put your grinding stone on a towel and lubricate it with oil or water. Stores sell honed oil along with grinding stones, but you can use any oil, or even water, for lubrication. STEP 2 Remove the screw that holds you blade together to handle each one separately. It will be much easier to work on the rock. Now, slowly pull the blade over the		
stone for you, keeping the beveled edge flat against the stone. Repeat this action carefullyl-until the blade has sharpened. If you start on the rock, finish with a few swipes on the potential for you start, run a permanent marker on the edge of the blade. When the marker has you have sharpened the entire blade. STEP 4 Repeat Step 3 with the second blade of the scissors. STEP 5 Once you have finished with the grinding stone, you will see a good edge of the ledge along the blade; these need to be eliminated. Reassemble the scissors by twisting the blades together, and opening them up then closing them a few times. Knock the ledge off by making a few test cuts through a piece of material the scissors are meant for, be it fabric or paper. If you are satisfied with the sharpness of the scissors, you are finished. Otherwise, repeat the process. You should practice on some old scissors until you get the hang of it- She will be crazy if you spoil her neck sewing scissors! But it won't take you long to get comfortable, and then you'll never have dull scissors in the house again. Once you're familiar with how it's done, it's really no sweat to sharpen and keep them sharp with quick maintenance, often every few months. Congratulations cut!
