The best dose of nostalgia I've had in a while! Note security tips: amkaplan on July 29, 2020 for the first time in 20 years, I have flight toasters on my computer! It takes me back to high school and installs after dark on my 386SX-16 with a huge two megabytes of RAM (!) and watchthose toasters stutter and shiver across the screen; Today they effortlessly slide across the screen on my dual-core i5 MacBook Pro. How times have changed... By Regan on June 14, 2020The screensaver is very nice. I wishthere would be all other afterdeck units including. Disney and StarTreck are available for Mac X. My only problem in Mac Catalina is that every once in a while the system pops up and asks to move the screensaver to the trash since from an anonymous developer. Although I go to privacy settings preferences to allow the screensaver to open, it only happens over and over again. It's a bit annoying. Which one has the same issues and may solve this problem? by Roger on April 28, 2020 Fantastic. I wish the operating systems were more characteras they did in the old days. Nowadays everything is very sterile and there is absolutely no way to add personal touches to your environment. Sad. But this screensaver really helps bring back memories of the best days of the operating system. Very, very well done.by John Schilling (StimpSoft) on September 5, 2019 I think it's a big piece of art and it's missed a lot, flourished with them growing up with Windows 3.0, 98 and XP. I would also like to see a free update of proxy screen saves such as Morface, on patrol, etc... By Palo Monk on December 2, 2018 does not even make the second screen black, she wanted to love this, but this is unfortunate: (by BoFiS on April 4, 2018. Mention on previous working hours with Windows XP. Now I have installed the screensaver to Windows 10 Pro x64 version 1709. To install the screensaver, copy scr-file to C:\Windows\System32. To activate goto settings-customize-lockscreen, go to another entry: Settings screensaver, copy scr-file to C:\Windows\System32. To activate goto settings and image provided (reflected on toasters) - brightness of light and color tuning (affects aircraft items only) - light location (affects flying items only) by Hirnsausen on April 20, 2017 Planet Screens » Screens » Themes » After DarkAfter is the name of the screen product first released for MacApple in 1989, and for Windows operating in 1991, by Berkeley. Users were

allowed to install and configure screensaver modules, and even create their own modules to connect the program. Each unit consisted of a different type of screensaver, the most popular of which being flight roasters, bad dog and starry night. These stopscreens are replicas of the original after dark screens.
