These tables are produced to the highest standards in Poland. Gpph welding benches and tables range is made for accuracy and used in each industry. They offer excellent flattening (+/- 0.5MM) & are made of S355J2+N class steel. There are 3 different classes of welding table: PRO, PLUS & ECO. The main differences in the table classes are the thickness of the worktop and their weight capacity. Welding table Top Thickness PRO - 15MM thick table top with 700KG per leg weight capacity PLUS - 12MM thick table top with 500KG one leg weight capacity ECO - 8MM thick worktop with 250KG one leg weight capacity Even our ECO tables are made of thicker and higher quality steel than most other welding tabletops available on the UK market. You can find cheaper, but you will definitely not find better quality! Our modular and traditional style welding tables have a hole system on all sides (table top and all sides); the holes are 28MM in diameter and have a chamfered edge for easy tool assembly. You also have the option to install standard legs or high-quality wheels. The range covers all the bases, including tables that are as high as 1M x 0.6M & net 3M x 1.48M. Custom sizes are also available upon request. We also offer complete toolkits that can be used to accelerate the production of mass production products. They help to lay out materials and help to keep the materials while they are welded or working on them. We have 4 level tool sets that can be found in all product lists. In combination with tool sets, we also supply individual tools such as clamps, screw fixing screws, squares and other items to create your own welding cutlery set. Why should I choose GPPH table during the competition? Higher quality materials - S355J2+N Class Steel Thicker Table Tops - From 8MM to 15MM thick, even our thinnest table is thicker than 99% competitors Higher weight capacity - Our largest PRO class welding table can withstand a whopping 5.6 ton weight on it Our PRO & PLUS class PLUS tables offer drilled holes instead of laser incision, allowing for better accuracy and no risk of cutting High-quality tools with tool for each available work Calibrated milled and chamfered 28MM holes in a 100MM x 100MM grid on all sides of the table - not only on the top of the table Made according to ISO 2768-1 for consecutive high quality welding tables Optional stainless steel table top We also supply various Bernd Siegmund welding tables made in Germany. Their mobile workplaces are perfect for DIY, hobby & amateur; light industry users who need welding jobs for their workshops. We also supply Bernd Siegmund rotating table, tools and system 16, System 22 & System 28 industrial class welding tables. Buy our range today! Flatweld is still open to mail order deliveries – either to order from our store or see our products on eBay – to look for a Flatweld British product to help you weld and produce so much easier and better. Of all the welding products that you can buy over time, your welding stand or welding table is likely to be the longest. This undoubtedly has the greatest impact on the work you produce and the convenience in which you can create and produce your own work, i.e. your productivity. So, not only to invest in any old work booth, this new concept of welding benches associated with its associated clamping system will revolutionize, simplify and accelerate its welding or production and are engineered at a high level to last and last. The tables are precisionconsifed from 6mm thick steel and deliver a flat pack for you to assemble (welding is required), thus reducing the cost. The construction of the welding bench with the base structure of the box section, which supports the top of the countertop, provides exceptional firmness and stiffness and accuracy as a flat table top. The worktop has 16mm laser-cut holes in 50mm centers that allow you to use various clips, extensions and jigs to firmly clamp your product, or to safely weld a piece on the surface of the true level, while different clamps allow you to work with various material profiles, including piping. Visit our store to place your order either ph 07415 391210 or by email – flatweld@gmail.com Quality flat packaging modular welding tables and fastening systems for a professional welder/fabricator or amateur. Also a range of modular tables from small to 1000mm x 1000mm means there is a table to suit your workplace. In addition, the tables can be easily connected to allow enable you to work on larger metal projects such as stairs, railings, balustrades, motorcycles or even car jigs. Our custom clamps, set-squares and riser blocks complement your table to accelerate your productivity. Prices – we think our prices are one of the most competitive in the UK market, so it offers you quality UK-made products at an affordable price. I have to have one of these – Matt, professional fabricator uk just a complete game changer..... SO ACCURATE..... and fast – Jon & Brian, mechanicalrestorers, UK Siegmund offer the toughest and most versatile welding and fastening tables on the market. These tables are widely used throughout Europe and worldwide in all industries, including from pipelines to bridge construction. They offer a completely robust and flexible clamping system that is ideal for mass production, batch production or prototyping. The latest range of tables is the Professional Extreme 850, which is the toughest table in the world due to its unique double hardened and plasma nitride surface, so it is almost unenactable. Due to siegmund's vast range of welding and clamping tables and configurations, it is not possible to display the full range of products on our website. Below is a step-by-step guide on how to select a table and attachments and tools to go with it. 1. Select a table system:- System 16 System 28 2. Choose a table style :- Basic Professional Extreme 750 Professional Extreme 850 3. Choose the size of the table:- Many sizes are available from 1000 X 500 to 4000 X 2000mm 4. Select table legs:- Main height adjustable dial Floor fastening 5. Select tools:- Stops Squares Clamps Bolts Tool Kits Accessories For more information can be found on the Siegmund website. Please click on the Siegmund logo below for more information Basic features siegmund welding and printing tables are a wide range of products for fastening and jiggng welded articles Fast release system designed to click and set, so quickly change overs and cost saving read guide below as a review before looking at the product range FacebookGoogle + Twitteryoutubelinkedinpinterest + Twitteryoutubelinkedinpinterest
