The root cubes of 125 is 5, as 5 x 5 = 125. Unlike the square root, the cube root is Positive. The opposite of the cube root is a cube calculation (power of 3). In geometry root cubes can be used to find the length of one side of a cube when the volume is known. Formula – Calculate the cube root of a number There is no quick formula to calculate a cube root. Most computers use a form of trial and error. Trial and error. Trial and error to find a root cubes. The test and error work well for perfect cubes. It can be very time consuming for non-perfect cubes because there are several decimal places. To find the root of the cubes after the trial and error: Guess a number that you think might be the root of the cubesMultiply the number x. If the result is too small, guess another larger number. If the result is too and 10 – 8 – 8 x 8 x 8 = 512 (response) Method 2 – Quickly find roots from perfect cube numbers This method makes it faster to find the root of a perfect cube number. If the number is not a perfect cube root number, however, this method will not give an answer. type root cubes? On a windows keyboard, enter a 3.
