Smooth scrolling on your Pixel phone with Pixel Launcher for Android.A new phone needs some new add-ons inside and out. This is a good reason to differ because the Pixel phone is a game changer and is different from the rest of the market. start with the pixel launcher. This is Google's own launcher for your phone for this perfect home screen experience. The app only has personalized Goggle cards by pushing to the right. You can also quickly access Google Search, jump to shortcuts, app templates, and more. The launcher is fast and smooth, but needs to have more flexible options. Set up your home screen on your Pixel phone with Pixel Launcher for Android. Discover Tom's guide to more Android information and Android Games.See also android forums. Download More Images Consider the flow of your tasks with Things 3 for iPhone.Your mind is filled with different thoughts and things. Get out the outlook on the things you want to do and plan them well and organize with Things 3 for iPhone. Examining the original version, this task manager brings both flexibility and strength into a well-balanced app for you. This app is designed to drop todo lists, repeating lists, categorize them, add context, tag them day by day, and more. The app doesn't get close to you because it's not clogged, without relentless control or no qualms. And it can be integrated with a variety of Apple apps like Apple Watch, Calendar, Siri, Handoff, Action Extension, Reminders and more. You can get this app for \$9.99.Take a stream of your tasks with Things 3 for iPhone. Discover Tom's Guide to More iPhone Information and iPhone Games.See also forums for iPhone. iPhone download can download and save email attachments such as music, videos, and documents. Although you can view most attachments within your email, downloading directly to your iPhone is useful if you want to review them later. As long as the attachment is in iPhone-compatible format, downloading, saving, and opening attached files is quick and easy. Open the Mail app on your iPhone by tapping the Mail icon on your home screen. Tap the email that contains the upload attachment. Emails with attachments have a paper clip icon that indicates that the file was included in the e-mail message. Tap the attached file, and then wait for it to download and open with Quick Find, the iPhone file view utility. To open a file with a specific app, tap and hold the attachment, and then select the app you want to use. If the attachment is a photo or video, tap and hold the attachment, and then select Save picture or video from the drop-down menu. The file is stored in the camera. Tap Photos from the home screen to open the camera and view File. iPhone 3GS and 3G owners, plus iPod Touch-users, time to turn on the computer and download download It's right here. The curtain has been pulled back on the iPhone 4, and the list of new features is massive: There is... Read more We're getting reports that iOS4 is live, but it's currently being broadcast by users right now. If it's not yet live for you, go to this update button until it's gone. If you can't get it, you can slow things down for people who can. Child, child.) You will need to download iTunes 9.2 (and you should run a manual backup if you haven't already). It's the only way to get brand new features in Apple's latest OS, which they announced a few months ago, including multitasking, fast-switching apps, local notifications and iBooks. For a list of the best new features mosey on here, otherwise check out the official line from Apple below. [Apple] Update: And here are direct links to the tuaw's politeness > This way you don't have to wait for iTunes to tell you that you're ready to update. That's what you're saying. G/O Media can get commissionsKandles and Candles Seti, \$25 or LessiPod Touch 2GiPod Touch 3GiPhone 3GiPhone 3GSand iPhone 4Ha installing these, hit the update connection while holding down the option button so you can select the fiel that you downloaded from the hard drive. Source: Apple.com App Analytics Company's new app analytics report Annie has been crowned the top iOS app of all time. More than anything else, the rankings reveal that even as iPhones change and operating systems evolve, our habits, when it comes to our favorite apps, haven't changed much in the last few years. In fact, if you try to guess the most popular iOS apps just by viewing your own phone, you might not be too far away. As reported by Sarah Perez of TechCrunch, Google, Apple and Facebook dominate the list of the top 10 most downloaded apps. Facebook's main app comes first, and the company also appears on the list with Facebook Messenger in second place, Instagram in fourth and WhatsApp in sixth. Google's YouTube takes third place and Google Maps is in eighth place. Apple's Find My iPhone comes in seventh place, while iTunes U is in tenth place. Rounding out the top 10 is Microsoft's Skype in fifth place and Twitter in ninth. Source: Blog.appannie.com For all 10 applications, us-run users lead in downloads. These apps have shown the remarkable power of living, and Perez reports that although most apps are more than four years old, they all continue to have millions of downloads a month. This means that these are apps that most users install when they get their first iPhone or iPad, and they are installed when they upgrade to a new device from an older model. The options are pretty good that you have one or more of these apps installed on an iPhone or iPad. The list of the top 10 most profitable apps looks quite different from the list of most popular apps, the winners on this list are also quite a logical bunch, although it may not be so easy to guess. As you can imagine, dating and entertainment apps dominate. Pandora leads, follow messaging app LINE, dating app Zoosk, Apple's Pages, streaming service Spotify, dating app Badoo, Skype, MLB.com At Bat, dating app Grindr and LINE PLAY. Interestingly, App Annie says pandora's best ranking was driven by U.S. users, who essentially contributed all of its revenue. In addition, Skype was the only application that appeared on both the most downloaded and the most profitable lists. At \$9.99, Apple's Pages is the only app on the list that generates all of its revenue from paid downloads. All other applications work on the freemium model. The sites became free for all new iOS devices in October 2013, but her historic income won her place on Annie's app list. Perez notes that many of the top apps by download and by revenue are also the top apps after monthly active use – except when it comes to China. In China, where users prefer local apps, none of the 19 apps in Annie's app download and revenue scales are among the top 50 by monthly active users. When it comes to the most downloaded iOS games, Candy Crush, unpretent, hard top site, follows popular household names Fruit Ninja and Angry Birds. Perez notes that seven of the top 10 games are based on a swipe mechanism, nine out of 10 are casual games, all 10 over two years. Clash of Clans and Candy Crush are the only two that have appeared on the most downloaded and top revenue lists, where Clash of Clans comes in first place and Candy Crush in second place. While huge companies like Google and Facebook dominate when it comes to the most downloaded apps for iOS, Sarah E. Needlman reports for The Wall Street Journal that behind some of the most popular games for the iPhone stands for some surprisingly small businesses. While some video games are heavy weights, as Electronic Arts has landed a place on the list, Candy Crush from King Digital is number one in downloads and number two in revenue generated. Supercell's Clash of Clans appears on every list, as does the Finnish company's Hay Day and Boom Beach. The common habit of games on both lists is that they are free to download and play. More from the Gear & Style Cheat Sheet: Apple has released iOS 14.0.1 for iPhone. This minor update corrects some of the errors that are found in iOS 14, including one that would reset the selected default web browser and email apps back to Safari and Mail when you restart your device.
