About search resultsO search resultsYP - The Real Yellow PagesSM - helps you find the right local companies to meet specific needs. Search results are ranked by a combination of factors that give you a set of options in response to search criteria. These factors are similar to those that you can use to determine which company you want to choose from in the local Yellow Page directory, including proximity to the location you're looking for, expertise for specific services or products you need, and comprehensive business information that will help you assess your company's relevance. Priority ads, or those with typical website buttons, indicate YP advertisers who provide information about their businesses directly to help consumers make more informed purchasing decisions. YP advertisers get a higher stop when ordering search results by default, and they can appear in sponsored ads at the top, page, or bottom of the search results page.
