Bt notifier apk for ios

This app is only available in the App Store for iPhone and iPad. Turn on your iOS device to send notifications to nearby BLE-enabled smart watches. Smart BT Notifier allows you to connect to all BLE devices, including smart watches and see their services. Smart bt notifier have the biggest feature that will make your iPhone much more useful. Now you can keep your iPhone in your pocket while driving or walking. Your smart watch will show you who's calling, who sent the text message, and then you can answer that call if your watch has this feature. Another great feature is that now you have anti lose technical protection. Connections work up to 10-30 meters, it depends on the type of Smart Watch and whether you are outside or inside. Smart BT Notifier has more great features: chat by bt connection with your friends. You can create groups or just simple chats. Share all your files via Bluetooth and find all the Bluetooth devices that are around you. To access all premium features and remove all ads from the app, you'll need to get our Premium version. It costs \$19.99 for lifetime access. Premium Features: - Create unlimited bluetooth chats.- Create unlimited virtual peripherals.- Connect unlimited number of times on any bt device.- Use unlimited - Find my device.- Share and save files via Bluetooth. Smart BT Notifier provides 2 premium subscriptions. Both are renewed automatically and can be cancelled at any time.* The name of our publications/services is :- Smart BT Premium M. The duration of the plan is one month (which comes with a 3-day free trial period) and the price is \$17.99 USD per month.- Smart BT Premium. The plan's duration is one week (which comes with a 3-day free trial) and the price is \$3.99 per week.* Payment will be debited from your iTunes account once your purchase is confirmed. The unused portion of the free trial, if offered, will be lost when you purchase a subscription to this publication, where applicable. Subscriptions automatically renew unless auto-renewal is turned off at least 24 hours before the end of the current period. Your account will be charged for renewal within 24 hours before the end of the current period and will determine the renewal cost. Subscriptions can be managed by the user and auto-renewal can be disabled by going to User Account Settings after purchase* You can cancel your subscription via this URL: Privacy Policy; Term of use: Smart BT Notifier becomes In this update, we've made major improvements to the UI. We hope you enjoy it. We have also fixed bugs and small bugs. Thank you very much for your emails and feedback. We are very happy to read them, even if some of them are bad. This makes us work harder and improve App. Also thank you for using Smart BT Notifier. The developer, Thuan Sang, did not provide Apple with details about its privacy and data processing practices. For more information, see your privacy policy. The developer will need to provide privacy details when submitting the next app update. Developer App Privacy Policy This app is only available in the App Store for iPhone and iPad. Turn on your iOS device to send notifications to nearby BLE-enabled smart watches. In this update, we've made major improvements to the UI. We hope you enjoy it. We have also fixed bugs and small bugs. Thank you very much for your emails and feedback. We are very happy to read them, even if some of them are bad. This makes us work harder and improve our app. Also thank you for using Smart BT Notifier. Faced with such a problem that I could not find a program to fully expose the functionality of my watch, because the original program did not start and the rest worked crookedly. And miraculously I found this program, thanks to which I managed to synchronize the watch without losing important features. In addition, the program satisfied with a juicy, simple and pleasant interface. In general, I advise everyone to download this program who have problems synchronizing the clock). The price should be reflected before downloading now there is no contact number and there is no way to know for sure if you have my message. I don't want to pay \$18 a month when the second app is free. And if money is collected for the app they should tell you and not just let you download it. If I hadn't read this description later than I didn't realize it and it's crazy. It's like they're deliberately trying to gag people and don't have a phone number to contact. All the other apps that do not free say the price of the app, so there are no surprises, and this one I'm not really going to be upset if I get charged for something I don't want, when there is a free app that works the same and my husband doesn't pay a dime for it and has never had any problems. so I hope the cancellation process is as simple as it was to click the download button and should start displaying the app price, so people are not surprised by the fees there bank account days after downloading the app which looks like it's nothing for free is that in the App Store all the other apps that cost everything display the price with the download button. I bought 3 gangs, from Xeaomi, but with their use there were constant problems, trips, breaks in the relationship. I tried to download a few more applications, but everyone does not meet my requirements and accidentally came across this application and from the first minutes I realized that this was exactly what I was looking for. Excellent application not one error for 3 weeks of use has not been noticed, extensive functionality and flexible configuration. Thank you very much, I recommend!! The developer, Thuan Sang, did not provide Apple with details about its privacy and data processing practices. For more information, see your privacy policy, will need to provide privacy details when submitting the next app update.
