And try how much you know with quiz! This app contains the following tutorials: • Money (SimCash) Advice • Residential Area Strategy • Production Guidelines • Get more coins • Basic building • Productive city is a good city • Keep HappyShare citizens all cheats, tips, tricks and strategies with your friends using the in-app sharing feature! There is no Internet connection required to use this application. Disclaimer: This is an unofficial cheat and strategy app for SimCity BuildIt. This app is not endorsed or associated with the Electronic Arts or SimCity trademark. The developer does not claim or have full rights to certain information in this application, this information is used only for viewing and passing in the application. Very limited information, you probably already know a lot. Filled with forced auto-pop ads. This app is so useful! Don't listen to what other people say! Actually, it's so good. Wow, such liars. Fake reviews fake name sososos many ads waste you time to review and use it. It's so fake that it has so little information the developer, Twisted Society AB, has not provided details of its privacy practices and data handling to Apple. The developer will need to provide privacy details when submitting the next app update. When I first wrote about SimCity coming to the iPhone back in November, the first question someone asked me was if the cheat codes would work. Managing a city can be rough - some people just want to build things and see what happens without having to worry about money. Well, I have good news for this crowd: cheat codes work – at least some of them. After running SimCity in the App Store, people again asked about using cheat codes. Commentator Jason P today informed us about the trick to make a cheat code entry box: just shake the iPhone. Once you do this, you will be greeted with a box that says Enter cheat code. It seems that there are two known cheat codes that currently work. Entering I'm weak in the box allows you to build anything at no cost, while entering to pay homage to your king gives you all the rewards of buildings without having to earn. SimCity addicts can recognize these codes from previous PC versions of the game. But I tried some other classic codes, including call cousin vinnie, llama and pornipsguzzardo, but they don't seem to work. Still, it's nice that EA throws this little Easter egg for those of us who are actually weak. I just downloaded simcity deluxe for iPad and started playing. It's a bit of a feeling with memory management, but so far no crash. So the first thing I'm going to start working on is the cheat codes. I've just started to get along with it, so if anyone else has already made progress with cheat codes, let me know and I'll update the list. I'll start with these first and see what we get after I get it past at least the 1990s. I think some scammers only work after the city is of a certain size or after a certain year ... Stay tuned! Oh, BTW, if you didn't already know, you get to cheat the code input window by shaking your iPad, and shaking it hard! So far I have got 5 confirmed and 2 that I'm sure they don't work. BTW, I just put a list of SimCity Tips together to improve my game. 'I'm weak' - All buildings, zones, util networks, infrastructure, trees and water are free. Confirm pay homage to your king – All rewards and opportunities will be available. Confirmed 'UFO Swarm' - After entering this cheat, start a UFO disaster. Confirmed Pay homage to your king – He gives you additional rewards. It worked once and then not again. SemiConfirmed 'nerdz rule' – The high-tech industry overtakes the existing industry. – Confirmed 'garbage inside, garbage out' – All trash buildings are available regardless of the year. Unconfirmed 'power for the masses' – All power plants are available regardless of the year. Unconfirmed I was just emailing it... They haven't confirmed any of it yet. I tried to turn them off and on, but they didn't do any real deep testing: Under utility menu, open the power plant window. Then close it with the X button in the upper right corner. On the Civic/Special Buildings menu, open the Rewards and Opportunities window. Then close it with the X button in the upper right corner. On the Tools menu, reopen the Garbage Disposal window. Then close it with the X button in the upper right corner. Now go back to the Civic/Special Buildings menu and open the Monuments window. The list of landmarks should now be very long and includes all buildings and structures in the game (except infrastructure). Now you can place any building. We have 1 cheats and tips on iPhone. If you have any cheats or tips for SimCity please send them here. We also have cheats for this game at: Wii: PC Questions & Answers
