## Sentence stems for essays

Photo: Negative Spaces (Pexels)When I was growing up, English teachers drove a specific rule to our writers’ brain: Don’t start a sentence with a conjunction. This, my friend, is correct. In case you need a little grammar-up brush-up, a conjunction is a word that connects sentences or clauses. And, but and/or is the most common three, but the English language has seven conjunctions, which you can remember with the Acronym FANBOYS: The ForAndNorBorYetSolt is okay to burn any of these right up to the front of a sentence. It’s okay now and it’s been okay as long as people have written. Ever read the Bible? In the beginning God created the heavens and the earth. The earth was without shape, and it was empty; and the gloves of the deep were upon the face of the deep, and the Spirit moved upon the face of the waters. And he said, Let the light be made. There was light. Plus, Grammar Girls - who I trust implicitly - say basically every modern grammar book and style guide agree that it’s fine. For example, the Chicago Style Handbook says of it: There is an everywhere—one with no historical foundation or graphene—that it is a mistake to start a sentence with a conjunction like, but, or so. In fact, a substantial rate (often as much as 10 percent) of the sentences of first-rate writing begin with contrast. It was so centuries, and even the most conservative grammarians followed this practice.G/O Media can get a commission2-pack: Juku STEAM Coding KitsPerhaps at some point in conjunction-sentence-starters seemed to get out of hand with teachers they felt they had banned the practice all together. Abstinence vs moderation, optional. That was an overreaction, and we were all suffering for it. What shouldn’t you do, though? You should not go to sprain commas after such conjunction when you use them at the beginning of the sentence. But maybe you really feel like one should go there. And, you’d be wrong. The exception, in my opinion, is with the word of God. I love a little comma action when I start a sentence and so forth. And this guy in Just Publishing Advice agrees with me: To me, the word for at the beginning of a phrase is a conductive publicity like therefore. So I would use a comma in both cases. So I missed the train at 5:26 pm, and then 5:55 pm, but finally did the 6:25 pm train. Therefore, there I stood up and stood up and stalled for the second time. But for the other six conjunctions, you wouldn’t normally use a comma. However, Lifehacker Deputy Editor Alice Bradley doesn’t agree with me and that guy; it’s very anti-comma-after-that. So I’m just going to drop this small phrase here - and a comma! - to see what it does. Stem a plant’s growing nutrient roots, and it gives the support structure for the rest of the plant: its people leave, flower, and all the other parts that make up all the organisms. The STEM approach makes learning fun and interesting, as well as convenient and functional, which makes it an effective tool for early childhood instruction. Later, as students begin to confront more complicated issues, the STEM approach helps them understand what they’re looking at – by associated related concepts relating to a way that makes sense. A combination of the practical and theoretical students preparing students to deal with the challenges of an increasingly demanding world, one in which science and high technology are ever-present and continue to advance. These students can apply their learned skills, but they are also prepared to continue their own education: they learn how to think outside of the box, how they are innovative, and how to assume leadership positions in a field that rewards their original thoughts.
