Chrono trigger apk 2.0.5

From Wowpedia this article describes all macro commands (or slash commands) recognized by World of Warcraft (without addons). To use the slash command, type the name that precedes the slash, and then follow any parameters that the command takes to the chat box (for example, /say Hello Azeroth!). Command names do not break down case, and you can combine multiple commands in a macro by placing each command on a new line. In the following list, commands with multiple aliases are usually listed under a more expanded alias. Battle pet commands Blizzard Interface commands These features open part of blizzard interface chat commands All custom chat messages can use chat substitution to insert dynamic content into messages. afk - Marks you as Away from the keyboard. announce - Switch channel notifications. ban - Prohibits users from user-created chat channel. Battlefield - Sends a chat message to the battlefield. csay - Sends the chat text to a channel referenced only by a number. chatinvite - Invite the user to the user-created chat channel. chatlist - Displays a list of users in the chat channel, or what channels you are currently a member of. chatlog - Enables/disables chat logging. combatlog - Enables/disables combat logging. chathelp - Displays a list of commonly used chat commands. ckick - Kicks the user from the user-created chat channel. emote - Perform an emote with the text. dnd - Marks you as Do Not Disturb. guild - Sends a chat message to your guild. connect - Connects or creates a user-created chat channel. leave - Leaves the user-created chat channel. moderator - Sets moderation in the user-created chat channel. mute - Prevents the user from speaking (voice or text) in the user-created chat channel. Officer - Sends a chat message to the officer's guild channel. owner - Displays or changes the owner of the user-created chat channel. password - Sets or removes the password on the user-created chat channel. party - Sends a chat message to your party. raid - Sends a chat message to your raid. rw - Sends raid warnings to your raid. answer - Replies to the last user to send you a whisper with a message. resetchat - Resets the default chat settings. say - Sends a chat message to players in your immediate local area. unban - Unbans user from user-created chat channel. unmoderator - Removes moderation from a user-created chat channel. unmute - Allows the user to speak (voice or text) in a user-generated chat channel.
