Drag racer v3 free download

Choose your car among a good list of well-known models and power up. Drag Racer is a pretty good Flash Version based on the classic Need for Speed and offers a lot of similar features. Don't let the graphics fool you. There are three different competitive modes: Arcade Mode, which must buy a car and prove your driving skills, Tunner Mode, which will start at 0 and race to become a real Drag Racer, and Online Mode, which create an account with the game's server and compete with other users. One of drag racer's most exciting features is the impressive track and extra database to customize your car. There are literally accessories for all parts in your car. In Tunner mode, you start with a small amount of money. If you want to earn more money and compete in more advanced races, you will have to start upgrading your car with the most advanced parts. You can also participate in car shows that will earn cash credits for extra parts, and much more. MajorGeeks.com - This is my Geek. There's a lot like him, but it's me. We played this game back in the day and it was good clean fun. Obviously, today's high-tech, flashy, realistic racing sims are nothing like that. Uses Flash to run on all operating systems. Drag Racer v3 is an authentic drag racing simulator where you get the chance to test your driving skills against various opponents on the racetrack. Buy a car, set it up, change it and race it. Collect credits and atarak new cars for parts as well as virtual garage. Get ready and be #1 drag racer in tournaments. To use Nitro: After purchasing the kit, you must click on the nitro bar to fill it. Then press and hold the 'N' key to use it in a race. Limitations: No online racing, just against AI. Comment Rules & Etiquette - We expect all comments from our readers, but any comment section requires some moderation. Some posts are automatically managed to reduce spam that includes links and profanity. When you make a post and it's not displayed, it's in moderation. We are emailed when posts are marked as spam and respond as soon as possible. Some posts can be deleted to reduce clutter. Examples include comments about religion, politics, and listing errors (for fixing the problem and highlighting your comment). Finally, be nice. Drag Racer V3 is an exciting and complex racing game where you can get behind the wheel of the most searched cars on the planet. Buy and bat straight from some really big car racing, or work carefully up, for example, owning a Honda Accord in a breathtaking Ferrari F50! For those unfamiliar with the term, 'drag racing' is the ultimate pastime for powerful soupy-up fans, the spectacularly modified sports car. A drag race is basically an acceleration contest between two largely modified cars, usually straight over, on the quarter mile 'drag strip' track. While drag races are usually on a flash, it takes extreme driving skills and meticulous preparation to give you an advantage, and make sure your car has a shot at victory! Timing is important when systemmally changing gears for optimum speed, while strategic changes before the race can give your car the extra support needed to reach checkered flag. You don't have to be a particular fan of drag racing or an automobile enthusiast to enjoy this wonderful exhibition of speed and power. If you have a competitive streak, a will to win and a desire to be the Best, you will fit right into the drag racing circuit! Crowd, you're dying to burn some tires for you, Drag Superstar! Let's give these people what they're coming up for! Drag Racer DownloadHow to Play: There are two different Game modes to choose from: Arcade Mode and Uner Mode. In Arcade Mode, you can only choose any car from a wide range of classic cars, well-known car manufacturers, and then race in a once-off drag race against the computer. In Uner Mode, start with a more modest model (Honda, Nissan, or Mazda) and gradually race your way to the top, earning enough 'Credit' to buy high-end cars like Ferrari, Lamborghini and Porsches. Use the following keys Arcade Mode computer keyboard to control your car during a race: Spacebar = Speed up; Up and Down Arrows = Change gears. Keeping your finger on the spacebar is necessary to maintain speed, but shifting gears at the right time is the hard part. If you stay in low gear for too long, the engine over-heats and you automatically lose the race. Keep an eye on the different dials on the instrument panel. If the red light is flashing, you need to upgrade gears. Likewise, if the temperature indicator is too high (to the red indicator), quickly advance a gear. Drag Racing V3 Download Full Version in Uner Mode, you have to choose between Easy, Medium and Hard difficulty levels. In Easy Mode, the controls are exactly the same as Arcade Mode. To change gears in Medium Mode, you need to pull your finger from the Spacebar. In Fixed Mode, you'll need to manually change the gear using your computer mouse or touchpad by clicking the gear bar and dragging it into the gear you want (shown in the lower-right corner of the game screen). You can also place 'Bets' on each of your races in Uner Mode. Use 'Credits' earned from these bets (and 'Tourney' winnings) to buy upgrades for your vehicle or buy new and better cars. Have a good day on the track! If this Flash-based game now works on PC/MAC IE11, try playing in chrome or firefox browser. Read more 1 Follower Comments No, you won't be cross-dressing in this game.
