

I'm not robot

Continue

If both houses of Congress cannot agree on a postponement date, the president can settle the dispute. Either the house or both houses can be called an emergency session for the president. The vice president serves as Senate president, but he can only vote to break the tie. The Chairperson, as referred to above, shall with the advice and consent of the Senate. He also has the right to issue pardons and reprieves. Such pardons are neither approved by the House of Representatives, the Senate, nor the recipient. Many pardons have been controversial. Critics argue that pardons have been used more often for political expedient reasons than for correcting misdemeanor. One of the most famous recent pardons was granted by President Gerald Ford to former President Richard Nixon on September 8, 1974, for the official misconduct that caused the Watergate scandal. Polls showed that a majority of Americans condemned the pardon, and Ford's national approval ratings fell thereafter. The President is a civilian commander of the U.S. Army and Navy. It is generally understandable that he has the power to order them to take appropriate military measures in the event of a sudden crisis. However, only Congress has the clear authority to declare war, as well as to attract, fund and maintain armed forces. Congress also has a duty and authority to lay down the laws and regulations under which the armed forces operate, such as the Uniform Code of Military Justice, and require that all generals and admirals appointed by the President be approved by a majority of the Senate before they can take up office. The courts examine both the executive body and the legislative court when conducting judicial review. This concept is not written in the Constitution, but was conceived by many of the framers of the Constitution. Judicial review in the United States of America concerns the court's power to review the constitutional compatibility of statutes or treaties or to revise administrative provisions on compliance with either law, the Treaty or the Constitution itself. The Supreme Court's important decision on the issue of judicial review was *Marbury v. Madison* (1803), in which the Supreme Court ruled that federal courts have an obligation to review the constitutionality of acts of Congress and declare them null and void if they are contrary to the Constitution. *Marbury*, writes Chief Justice John Marshall, was the first Supreme Court case to break down an act of Congress as unconstitutional. Since then, the federal courts have exercised the powers of judicial review. The Supreme Court has the right to overturn laws and executive actions which they consider illegal or unconstitutional. The judiciary is also involved in the process of impeachment of the President. The chief judge presided over the Senate during the presidential impeachment trial. The rules of the Senate, however, generally do not confer much power on the presiding officer. The role of the chief judge is therefore limited in that regard. Limited.
