Flynn hope of the wicked

Do you want more? Advanced embedding details, examples and help! This book will shock the average person. It will even shock those who have some experience in studying Biblical prophecies and who will be familiar with the future rise of the Antichrist and the creation of the Mark of the Beast. A mark on the right hand or forehead of a person who saddles loyalty to a future leader and without whom no one will be able to buy or sell. (Revelation ch.13:v16). It will shock because it reveals that most people still live in ignorance of how close we are to such a situation. Although it is not a religious book, some references to Scripture are made that make the relevance of what is being discussed here even more relevant to our times. At first, the book describes itself as not being a walk in the park on a sunny day. The content will cause you to question all the news you see on television, listen on the radio or read in the newspapers. The book confirms that you will, from now on, question the news and relative information in a new and more penetrating way. The book reveals how most people actually form their opinions and their attitudes, along with their opinions about world events from the information they get through the media. Few understand that almost all news organizations are controlled by a global elite that really has conditioned you without you knowing. The news being selectively controlled and reported with a view to this goal. The book demonstrates the speed and efficiency in which we are being pushed into a New World Order, a One World Religion, where compliance will be mandatory, along with the loss of national identity/sovereignty and even a World Army. Each question is studied with many references and sources being cited. The manipulation and abuse of technology is examined. An example is given on page 230 that refers to a recent film titled Enemy of the State that painted a nightmare picture of the potential for abuse of the increasingly advanced digital information structure that allows our movements, purchases, communications and location to be monitored. Personal identity cards and personal micro-chips that are being implanted in the right hand or forehead are examined, along with the information that can be contained. A patent registered for the latter is even illustrated in this book. The application of personal global positioning systems are also mentioned. The implications are enormous. The book states that the classic & prophetic novel by George Orwell 1984 and Big Brother is almost coming, with the prospect of abolishing all forms of privacy. Many can accuse this book of frightening. Each individual must form his or her own opinion. What the book provides are many references to the reader exactly that and in itself provide the reader with an awareness of what may be happening behind the scenes of the EU, the UN and the many global systems to which the average person has little access. Many well-meaning people today look to the realm of politics for solutions to the many and diverse social problems facing the world. They believe that if only they could put good people in places of power, then everyone would begin to correct themselves and heal. They are noble and sound beliefs; in fact, one would expect the political route to bring this expected result. That's what politics is for, anyway, right? We come to believe that the government does the will of the people, that the vote of the individual is the best modeler of politics. The reality, however, is quite different, and this is supported factually and undeniably in Ted Flynn's new book, Hope of the Wicked. Politics has become just a tool for chaos; the solution to the evils that confront us exists far beyond. How do we get to the point where we find ourselves, a point defined by the lack of ability to govern our own future? If we can no longer determine our temporal destiny, then what happens? The answers are in a vast tangle of forces, organizations, individuals and philosophies, a purposely confused tangle to avoid detection, a mass united tangibly by the desire for money and power, intangibly by the very essence of deception. What are these forces? How do they work? How did they reach the height of power? The truth is not easy to explain, nor is it easy to accept. The disappointment underlying the plans and processes is extremely subtle and widespread. To understand everything that is in progress requires delving into a large number of areas. Hope of the Wicked does just that. Exploreconvergence on a global basis of multinational corporations, foundations and political and sociological instruments of a government of a world to bring a New World Order. The book has 550 pages of 82 photographs and 1,200 footnotes, with a strong historical basis to show that there is a global elite working to end the sovereignty of nations, to put everything under the United Nations. The areas explored are: the plan to bring America to the New World Order, the altered roles and the makeup of the family, as a global elite is working to change the form of money, the abuse of technology, the Shadow Government, executive orders, the role of the Federal Reserve and who owns it, the Bilderbergers, the Council on Foreign Relations, the Trilateral Commission, identities of the great wigs and global wonks, as the agenda has no ideology and is neither Democrat nor Republican, but on control, the erosion of freedoms and rights, the planned collapse of the world economy to bring a new order of chaos, the intentional dumbing down of American education, and many other issues that are bothering you in your gut but that you you put your finger. Hope of the Wicked is about the greatest disappointment in modern history. The book is filled with hundreds and hundreds of quotes from world leaders themselves showing where they want to bring the world. Nothing is left to guess; when you're done reading, you'll understand that what seems to be inconsistent and illogical to you is not for the global elite that wants to bring the United States under the auspices of the United Nations. The quotes are from established world leaders, past and present, and most are household names. He is willing to all see what they have organized outdoors for all to observe if they want to learn what the Masters of the Universe are planning for the New World Order. The book is neither left nor right politically, but it is the view of a scribe observing these trends and issues over a 25-year period. It is mainly a resource guide and mini-anthology, with an index and 38 pages of footnotes that will be more difficult for someone to have problems, mainly because the quotes are from the authors themselves what they themselves have accomplished, and where they expect to go in the future. When you're done reading the material presented in this book, you'll never look at the news the same way again. All this is equivalent to controlling, controlling your money, your work, your family, your education, your attitudes, your beliefs, your thoughts. Do you think it's impossible? Read Hope of the Wicked and you will know for sure that not only is it possible, it is already being done. Many well-meaning people today look to the realm of politics for solutions to the many and diverse social problems facing the world. They believe that if only they could put good people in places of power, then everyone would begin to correct themselves and heal. They are noble and sound beliefs; in fact, one would expect the political route to bring this expected result. That's what politics is for, anyway, right?
