What are the products of a neutralization reaction between h2so4 and koh

The formula for neutralizing H₂SO₄ using KOH is H₂SO₄(aq) + 2KOH(aq) --> K₂SO₄(aq) + 2H₂O(l). This reaction between sulphuric acid and potassium hydroxide produces salt and water. Formula H₂SO₄(aq) + 2KOH(aq) --> K₂SO₄(aq) + 2H₂O(l) represents the neutralizing reaction of sulphuric acid acid and alkaline potassium hydroxide. When these two chemicals are mixed together, they form a solution of water, or H₂O, and potassium sulfate, salt. Sulphuric acid is a strong acid and potassium hydroxide is a strong principle. The reaction that occurs is exothermic; this means that heat is a by-product of the reaction. K₂SO₄(aq) + 2 HOH(l)(Note that H₂O and HOH are the same compounds: water),attachedImageUrl:null,reference:null,answerer:{eid:QsK4Ad5_jlb.
