Otium wireless sports earphones manual

from the usual red to a solid blue. Dropper time should turn on Bluetooth on the iPhone 6. By holding down the power button of the Otium Wireless Sports Earbuds for a few seconds, the earbuds will turn on. If you wear the earbuds, you can hear it saying Power On. At this point it's discoverable over Bluetooth and you can see 'otium beats' appearing under 'Other devices'. Once you click on 'otium beats', you'll start to pair the Otium Wireless Sports Earbuds with the iPhone 6. While wearing the Otium Wireless Sports Earbuds, you can hear a voice saying, connected, confirming that Bluetooth pairing is successful. In the future, all I have to do to use the earbuds is to turn Bluetooth on the iPhone 6 and turn on the earbuds and they'll automatically pair with the earbuds saying in your about Power on, connected!. After using these earbuds to stream extensively music, watch TV shows, and play games, while I found no audiophile I personally found these earbuds to be very satisfying. The lack of a cord is also extremely convenient - nothing gets tangled up, but then I often forget to bring my phone with me sometimes and I'm a lot of feet away before I realise I left the phone behind. There are some minor issues I've found with the Otium Wireless Sports Earbuds working with the iPhone 6. When the earbuds initially commit to the iPhone sometimes the sound is choppy for a few seconds, but then the choppiness goes away afterwards. Also, there is a slight mismatch in audio levels on the iPhone 6 and the Otium Wireless Sports Earbuds. The image below displays the level at which the earbuds no longer emit any sound. Basically the first increment past dampen still emits no sound. Finally, when you listen to music at night when everything is quiet, the headphones can look a little louder than necessary, but not unpleasantly so. The Otium Wireless Sports Earbuds generally work well with the iPhone 6 to be expected given that Otium positions these earbuds as a cheap Beats PowerBeats2 Wireless alternative. Top reviews Most recent Top reviews To pair it with your device you're going to need to press and hold the power button on the headphones.
