OverviewThe Legend of Zelda: Link's Awakening DX is a 1998 remake of the 1993 Game Boy game. It offers color graphics, a new dungeon and other new features. PTJ rates this game: 3/5Adthtingly it's the worst Legend of Zelda game ever for its still pretty good. Puzzles are classic Zelda, enemies are well positioned and bosses/mini-bosses are fun. A lot of things were taken from Mario games, but it was fun to kill goombas with a boomerang and grab yoshi doll claw game. even all your problems are Ok is the first Zelda game handheld. mirrormage rates this game: 5/5Adidly, despite being a gameboy game, Link's Awakening stands out as one of the strongest games in the series with its classic gameplay and quirky, somewhat unsettling world. More of the same goodness came from we expected link to the past. Mystics Apprentice rates this game: One of the best games made by Gameboy, and now we can play this color! Gameplay reminds me very much of The Link's past, using many of the same objects and placements and such. Granted this is not the best Zelda game, considering it is gameboy, but gameboy game, it is awesome! And the typical Zelda- what else do you want? The story ring wasn't the best. To be honest, I thought it was quite strange and wasn't a real sign. But oh well, Zelda isn't really known for this storylines anyway, so at least the gameplay made the missing story. I thoroughly enjoyed this game, but then again I'm a die-hard Zelda fan. If you're looking for a good RPG or just love Zelda games, I'm sure you'll enjoy it too!
