Igneous rock worksheet answers

Print answer key (print test content only) 1. Identify each of the following as an intrusive (I) or extruded (E) extruded rock. Write I or E on an empty line. I have 1. Granite E 2. Obsodym E 3. PumiceE 4. AndesiteE 5. RhyoliteE 6. Taffy 7. DiOratei 8. Pegmyitl 9. Gavro10. Skoria 2. Create a paragraph describing the difference between intrusive and extruded emitted glowing rocks. Incorporate the following words into paragraphs: intrusive, extruded, volcanic, pluto, crystal (S), MAGMA, LAVA, mineral (S). Answers vary. The student must convey the idea that intrusive mujiam is often formed underground in plutone in the slow cooling of magma. Intrusive rocks form larger mineral crystals because they take longer to grow during the slow cooling process. Extrusion rocks are formed from the much faster cooling of lava emitted from volcanoes on the earth's surface. Mineral crystals in extruded rocks are small, even if they do not grow as much as intrusive rocks. Print Answer Key PDF Now Calendar Copy Print Answer Key (only test content is printed) Easy to use good word search worksheet for fun sub-planning, emergency, item work, warm-up exercises, homework, vocabulary review. Topics of word search: basic earth science words include: division, color, cycle, erosion, fracture, hardness, IGNEOUS, LUSTER, MAGMA, metal, transformation, MOHS, press page 26, 7, 8, 9, 10, 11, 12 3rd, 4th, 5th, 6th, 7th, 8th, 9th page 2
