Have you seen the premiere in theaters? Regardless of the answer, you can get the most dangerous thing in the universe that can destroy half of sentient beings. Infinite War Avengers showed us what this glove can do while it's in the wrong hands. The consequences are sad, half the world turned to dust, as are some Avengers. Created by josia50 Infinite Stones The infinite glove is useless if there are no infinite stones in it. There are six stones that appeared at the origin of the universe. If you put them together and put them in the infinite challenge, they will become an incomparably powerful weapon. If you dot them and put on this glove, then your new skills will be: laser shooting, teleportation, freezing, mind control and most interesting – the destruction of 50% of all living beings.
