When PUBG Mobile and Fortnite gained worldwide popularity, Chinese game developer Xiaojiao Zhang released Last Day's Rule: Survival. This game is considered as a combination of Rust and the above two games. This is an online survival game for android operating system. From hairstyles, hair color and skin color are determined by the player so that they feel best. In the gameplay game you will play the role of a new character in the sky falling on a vast uninhabited island. The controls are relatively simple with other role-playing survival games. On the left side of the screen, there is a virtual button to help you master the movement with a small button that automatically picks up and displays the inventory. On the right side of the screen is a game map next to basic operations such as jumping, lying, sitting and hitting. With a bag in hand, your first job is to cut down trees to build a house. The house will make you safe from external hazards using the passcode setting feature. This is also where you can rest, save accessories, and research collected recipes (including weapons and accessories). What to do with the rules of the last day, like the last day on earth: survival is to find materials available in nature such as stone, iron, sulfur. For example, if you feel that a chalet is too small and unsafe, you can build your own castle by collecting ingredients along with learning recipes. Or, at some point, if you get tired of hunting with a bow or axe, the gunThe perfect choice. In addition, the rules of the last day: Survival also assigns many missions to players throughout the journey to discover this game. By completeing assigned missions, players unlock many new formulas, equipment and unusual materials. PvP Mode Should be pleased that this vast and dangerous island is not the only one present here, at least. There are many other players who can be brought to the same island as you. Players can choose to interact with each other in a variety of ways, including how to talk, exchange items, and fight throughout the chat frame. It's up to you to make friends or feud with other players. You can choose to shake hands with groups that discover the features of the game together and create your own empire. Or, otherwise, turn yourself into carnage mode: kill and plunder all the people you meet. But don't be too bloodthirsty, they will call society back to become friends! The image of this game is no less than the survival evolution: PUBG Mobile or Arc, but I think it's a little more. In-game graphics are built on a realistic 3D platform that focuses on every detail. In addition, day and night effects and weather effects constantly change with a very wide third party view that allows players to observe the game scene in the most comprehensive way. Finally, the game sounds very vivid and wild, very suitable for survival games. Choose a high-end device for the best experience.
