The published scope of Psychological Science publishes short research and commentary reports. The journal publishes advanced research articles, short reports and research reports spread across the entire spectrum of psychological science. Psychological Science is a general interest journal that publishes articles of general theoretical significance and widespread interest in the field of psychological science. [1] The paper covers topics from cognitive, social, developmental and health psychology, as well as neurobiology and biosynthesis. The journal also publishes studies using new research methods and innovative analytical techniques. Its editor is D. Stephen Lindsay from Victoria University, British Columbia, Canada. [2] Characteristics Published monthly, the magazine appears online and prints with the first online articles appearing weekly on the magazine's website. In addition to a large number of organizational subscribers The 25,000 members of the Psychological Science Association received the journal as part of their membership. Previous editors Stephen Lindsay, Victoria University (2015-2019) Eric Eich, University of British Columbia (2012-2015); Robert V. Kail, Purdue University (2007-2012); James E. Cutting, Cornell University (2003-2007); Sam Glucksberg, Princeton University (1999-2003); John F. Kihlstrom, University of California, Berkeley; and William Kaye Estes, Indiana University Reference ^ Information for Contributors. Retrieved November 12, 2008. ^ Psychological science. Retrieved December 20, 2012. This article is about an academic journal of early psychology. You can help Wikipedia by expanding it.vteSee tips for writing articles about academic journals. Other suggestions can be found on the article's talk page. Taken from The Impact Factor, as calculated by Clarivate Analytics, is a measure of the average number of times an article from a two-year timeframe was cited in a given year, according to citations recorded in the Web of Science database. Impact 2019 impact 2019, for example, calculated as follows: A = number of times the article published in 2017-2018 was cited in indexed journals in 2019 B = total number of research articles and reviews from magazine published in 2017-2018 Impact Factor = A/B Browse all impact factors magazine This list includes only journals with Impact Factors 2019. For a full list of magazines published by APA, please visit the Journal homepage to browse our portfolio by title or topic. Note: Categories marked with a so star (*) are in the Expanded Science Citation Index (SCIE). All other categories are in the Social Science Citation Index (SSCI).
