Personal philosophy of health education

Education includes information on learning and vocational training. Learn more about topics like home education, college readiness, career paths, and more. Educators, whether teachers, principals, counselors, or educational assistants, provide our first contact with the lifelong learning process. They also have a big impact on young people. There are great educators out there, but they're on demand. So how do you get them to apply for a job with you? In this section: Science-rooted tobacco products, FDA public education campaigns are critical to our public health mission. Learn more about current campaigns through these resources. Educates at-risk teens about the harmful effects of cigarettes, smokeless tobacco and e-cigarettes/vapes. Prevents tobacco use among at-risk young people between the age of 12 and 17 who identify with hip-hop culture. Prevents tobacco use among young LGBT adults (18 to 24 years old). Encourage adult cigarette smokers (25 to 54 years old) to quit smoking through support messages that underscore the health benefits of quitting smoking. Health information The tobacco use landscape is changing rapidly. Learn more about the topics the FDA is researching and tracking to inform our regulatory policies and protect public health. What you need to know about tobacco products and their components Sign up for email updates Back to the top The trusted independent guide to online education for over 22 years! Copyright ©2020 GetEducated.com; Approved Colleges, LLC All rights reserved Purdue University Global's Master of Science in Health Education could prepare you to help solve community health problems through educational programs that promote healthy lifestyles and behaviors. The master's program offers a complete mix of public health, health education, and health care management content. In addition, the program aligns with the competencies published by the National Health Education Credentials Commission (NCHCEC) for Certified Health Education Specialists (CHES) and Certified Health Education Specialists (MCHES). And, as a master's degree graduate, you may be eligible to participate in both exams.**Although certain programs at Purdue University Global are designed to prepare students to take several certification or licensing, the University cannot guarantee that the student will pass those exams. In some cases, field experience and/or background checks may be necessary to be eligible to successfully take or pass exams. Students should investigate the requirements in the state in which they intend to seek employment.% Online 100% Online Bachelor Transcript(s) Copyright Transcript(s) ©2020 GetEducated.com; Approved Universities, LLC All rights reserved While going through your own education, education, they are tasked with developing an educational philosophy, which is a personal statement by the teacher detailing his guiding principles on such education-related issues, such as how students learn best, as well as the role of educators in the classroom, school, community, and society. The statement of educational philosophy is an essential document because it conveys your most personal thoughts and beliefs about education. This philosophy plays an important role in the lives of many educators and can be a tool to help you not only develop your teachings, but also help you find a job and promote your career. An educational philosophy refers to a teacher's vision of the greatest purpose of education and its role in society. Educational philosophy issues involve topics such as a teacher's vision of his role as a teacher, his vision of how students learn best, and their basic goals for their students. An educational philosophy should guide a teacher's discussions in job interviews, and should be communicated to students and their parents. When writing your statement of educational philosophy, think not only about your classroom management style, but also about your beliefs about education. From differentiated learning and teaching styles to the role of the teacher in the classroom, consider the following questions to help you frame your philosophy. Suggested answers follow each question. What do you think is the greatest purpose of education in a society and community? You could respond that you believe that education is a fundamental driver of change, progress and equality in society. What is, specifically, the role of the teacher in the classroom? A teacher's role is to use classroom instruction and presentations to help students learn and apply concepts in math, English, and science. How do you think students learn best? Students learn best in a warm and supportive environment where they feel the teacher really cares about them and their success. In general, what are your goals for your students? A teacher's primary goals are to help students find out who they are and how they can serve their community. What qualities do you think an effective teacher should have? An effective teacher needs to have a basic sociocultural awareness and acceptance of his own cultural and other identities. Do you think all students can learn? A good teacher certainly believes that every student can learn; the key is to understand which educational methods work best for each student and then catering instruction to each student's individual needs. What do teachers owe their students? Teachers must students, a passion for the subjects they teach, their instruction, and a desire to help students succeed. What is your overall goal as a teacher? A teacher's overall goal is multifaceted: to make learning fun and inspire students to find love to create an organized classroom; to ensure that expectations are clear and the qualification is fair, and incorporate the best teaching strategies available. How do I create an inclusive learning environment? Students come from a variety of socioeconomic and demographic backgrounds and can vary greatly in cognitive ability and learning styles. A teacher should strive to incorporate instructional methods that consider all of students' diverse backgrounds and learning skills. How do you incorporate new techniques, activities, and types of learning into your teaching? A teacher should keep up to date with the latest educational research and incorporate best practice methods into their instructional methods and strategies. (Best practice refers to existing practices that have a widely agreed high level of efficiency.) His educational philosophy can guide his discussions in job interviews, be placed in a teaching portfolio, and even be communicated to students and their parents. Many schools use these statements to find teachers and administrators whose approach to education aligns with the school's mission and philosophies. However, don't make a statement that you think the school wants to read; develop a statement of educational philosophy that represents who you are as an educator. Schools want you to be genuine in your approach. A full philosophy statement should include an introductory paragraph, along with at least four additional paragraphs; it's essentially a rehearsal. The introductory paragraph indicates the author's point of view, while the other paragraphs discuss the type of classroom the author wishes to provide, the style of teaching the author wishes to use, how the author would facilitate learning for students to get involved, and the author's overall goal as a teacher. The body of your statement of educational philosophy might include a statement like this: I think a teacher is morally obliged to enter the classroom with only the highest expectations for each and every one of his students. Therefore, the teacher maximizes the positive benefits that naturally come along with any self-fulfilling prophecy; with dedication, perseverance and hard work, your students will live up to the circumstances. My goal is to keep an open mind, a positive attitude and high expectations to the classroom every day. I believe that I owe it to my students, as well as to the community, to bring consistency, diligence and warmth to

my work in the hope that I can ultimately inspire and encourage such traits also in children. In fact, you can change your statement of educational philosophy throughout your career. Update your education is important to make sure it will always reflect your current opinion on education. You can use this tool to focus on your goals, stay in the future, and stay true to who you are as
