## Secondary math 2 module 2 answer key 2.9

LDM 2 module 2 and download module 2 lesson 1 answer key PDF 1 for activity 1. The closure of schools around the world due to the global epidemic poses serious challenges to the delivery of quality fundamentals. Education. What do you think is the fundamental concern of curriculum standards that need to be addressed to ensure continuity of learning as a teacher? For example, quote a specification. Do you think only teachers can address these concerns? Why or why? Ans: This global epidemic we have today makes children's education more difficult to achieve. This also presents a huge challenge to the Ministry of Education to conduct training under this new normal situation. The best way to solve a problem is to switch to distance or modular learning to adjust this new general learning. This strategy ensures continuity of learning. These concerns are with the cooperation of teachers as well as all the dead army's education and non-education staff. And of course through parental learners and stakeholder support. 2. Even before the proliferation of COVID-19, which eventually led to the closure of schools across the country, the congested curriculum was a perennial problem for teachers (Andaya, 2018). This is recognized as one of the disturbing factors in the deterioration of performance of Filipino learners. Do you agree with this observation? Why or why? Ans: Yes, I agree that the Department of Education has adapted and adapted several curriculums to achieve higher standard education and can be a globally competitive learner. However, a congested curriculum prevents you from achieving your goals. Students are unable to cope with content standards, and sometimes with limited time assignments, they take time to complete the entire quarterly subject. Activity 2 1. What is the general and specific purpose of MELCs development? - The Ministry of Education's Curriculum Development Bureau has developed MELC to cope with the rapid changes in the educational mood caused by the COVID 19 epidemic. The focus of education has been simplified to the most essential or indispensable learning competencies. -MELC was developed in response to UNESCO's fourth sustainable development goal, especially in the event of an emergency. -MELCs can be used as a mechanism for ensuring educational continuity. -MELC plans to help schools navigate a limited number of school days as they adopt multiple delivery schemes by providing ample educational space. How can the curriculum help identify essential learning competencies? - Analysis of the interconnectivity of knowledge and technology in the prerequisites of learning competencies for each subject area. - Curriculum review maps essential and desirable learning competencies. It also led to identify gaps, problems, and concerns within the learning area and grade levels. It helps in identifying areas for learning engagement, experience and improvement of results and consequently improve working 2.6 intervention notes
