Lava lamp light bulb target

You may think that light bulbs are a commodity, and for many, they are. However, not all of them are the same. Some smart home features, some ultra-efficient, some color change, some even Wi-Fi! This week we are looking at five of the best light bulbs to save you money around the house, or customize the lighting for your mood, based on your nominations. Earlier in the week we asked you which light bulbs were the best. You've given us a lot of candidates and tons of options to choose from, but we only have space for the best five people. Here they are, in any particular order: not all light bulbs are alike. Some have smart home features, others are bursting with energy. Some can... Read more the original Lifex LED Bulblifx does more than just light your home - although it certainly does. Kickstarter's success story. LEDs are only part of a smart home package that gives you complete control over the intensity, color, and type of lighting in your home. THE ORIGINAL LIFX IS A 17W LED LAMP THAT SUPPORTS MULTIPLE FITTINGS, 16 MILLION COLORS AND WORKS WITH SERVICES SUCH AS IFTTT AND OTHER SMART HOME APPLIANCES SUCH AS NEST HEAT AND NEST PROTECTION. It's Wi-Fi and Bluetooth enabled, and can be controlled by your smartphone, either individually, one bulb at a time, or if you have multiple you can program complete rooms or areas with specific types of lighting. For example, you can set your bathroom to soothing, dimmed light, and your office with brighter, more active lighting if you prefer. They don't come cheap though. Each one will set you back just shy of \$100, although you can buy packs of multiple leds at a discount. G/O Media may get a mandate from you who nominated LIFX note that it is incredibly versatile, and since you can control the lighting in your home from your smartphone at any time, you can get the lights in your home before opening the door, program different areas of your home to suit your tastes, and that mobile apps are available for both iOS and Android, a nice feature. You praise it for supporting a lot of colors, and the fact that you can set timing and set lighting programs so lighting in your home adapts to you throughout the day. Many of you have noticed that they are expensive, but you can get sold if you shop smart. You can read more on the nomination topic here. Cree 60W soft white LED cree bulb got a lot of love in round nominations, largely because their bulbs are energy efficient, dim, bright as all getout, and relatively affordable still. A four pack sets you at \$35 on Amazon, and you'll get the equivalent of 60W of lighting just about 9.5W spent on their energy. It looks like a normal bulb, so you don't have something that won't fit regular sockets, leapers, or other games. Plus it's mutable, so you can use it in games where you have a dimmer Nice bonus. It immediately shines with power, so no warm-up time is required. If you are not looking for tons of bells and whistles, these are a great purchase - they're affordable, bright, get the job done, and incredibly energy efficient, especially if you want to try leds but don't know where to start a simple, basic bulb. G/O Media may get the commissionThese from you who nominated cree 60W replacement and pointed out all these features, but also made it clear that they are specifically durable. You said that you have these in games that get banged around a lot and take a lot of punishment, and they stand like long-term champions. You also called for the fact that Cree BULBS support Cree Connectivity, which supports Z-Wave and allows compatibility with smart home systems such as SmartThings. You can read more on the nomination topic here or here. BeOn Home Smart LED BulbsBeOn smart home LED bulbs line is a great lighting, sure, but it's already designed to improve your home security and your security. While other smart bulbs focus on customization, these have been designed to make them more difficult for strangers to see if you are away from home, and to provide backup lighting and emergency safety. They have all of the basic features you'd expect, they're 60W equivalent in 800 candles, dim, and they still work with regular games and keys, even if you use BeOn apps for lighting schedules software and turn your lights on or off remotely. Each BeOn bulb has backup power, so even in the event of a power outage or emergency you will have some lighting, and if you have other devices for home safety - such as a smoke detector or a carbon monoxide detector exploding, the lights will respond as well so you can see your way out of the house. The lights even learn your behaviors, and they continue to light rooms as if you were at home when you're on vacation. The dining room will light up at dinner time, the bedroom will light up and the living room will go dark late in the evening, and so on. They're not cheap though - the three-bulb system is \$249 directly. Those of you who have nominated BeOn smart bulbs have pointed to many of these safety features, namely that they are great to make sure that your home is safe and secure even when you are not there. So they can light up when the doorbell rings, whether you're at home or not, so someone at the door has to wonder if you're at home and just don't answer the door, or not home at all. You complimented them to learn your lighting habits in real time, making to deter the big thief without having to manually set up timers on lamps and keys. You also praised the backup lighting, and the fact that the lights all come to life if the smoke alarm goes off is a wonderful feature that we hope you never need. Read more in her candidacy In here. Philips 454900 60W Slimstyle LED BulbPhilips '60W Slimstyle LED LAMPS have a unique design. They still fit in all standard plugs and fittings, but instead of being a full round, they're kind of flat. They may put some people off, but once they're in a fixture you probably won't notice it. Plus it's cheap dirt. Leds bulbs equivalent to 60W are \$14 for two packs on Amazon, making them great entry points for LED bulbs if you are considering buying some. They get you the equivalent of 60W on 10.5W of power and are classified for nearly 23 years of life under normal circumstances. In addition, they are tenableable, so they can go to your favorite dimming lamp or room lamps. G/O Media may get a commission on the filtering theme, you praised them for natural-looking light, although some of you pointed out that the unique design means they're better at closed fixtures, because they give off a little more light on the flat sides of the side of the lamps. It can be plus or minus depending on where your lighting is in your room. Either way though, most of you praised the LEDs for being affordable, no frills lighting that won't cost you an arm and a leg. You can read more on the nomination topic here. GE reveals the 60W LED BulbGE's Reveal Lighting System is actually a series of light bulbs in different shape factors and brightness, but most of you settled on the standard 60W A19 lamp because of its affordability and versatility. It's 60W equivalent bulb uses only 11W of power, it will set you about 10 bucks, and is rated for use in damp environments, at home and abroad. GE holds a series that reveals up on natural lighting, bright, durable and long life. The company also claims that the bulbs actually reveal making your lighting better, highlighting colors and patterns that you won't see with traditional incandescent bulbs, and offering more accurate lighting than other harsher LED bulbs. In addition, they are available in countless color temperatures, combinations, and patterns. You can get soft white, bright white, daytime lamps in the series reveal, and even in this 60W model, so you have a lot to choose from depending on where you plan to put the light, and the type of light you want. G/O Media may get the commissionThose from you who nominated the GE disclosure series as some of those sentiments echoed, especially since whatever GE bulbs have to make colors come alive, it actually works and it's not just fluff marketing. I have praised the lights for being natural and bright, but also transforming the room in which you have them, and for near-eternal permanence. One of you pointed out that you own LED lamps from multiple companies and manufacturers, including some other companies here, but these are your favorites in general. he also praised her for being readily available in only Any retailer (so you don't have to order through some mysterious, specialty store), and their durability, they're strong enough to take a few drops and fall, too. Read more on nomination slate topics here and here. Now that you've seen the top five, it's time to put them to the public vote to determine the winner. No sheriff mentioned this week, since the candidates dropped very quickly after these. However, there have been other options in inviting the contestants to explore it, so if you're looking for something else, be sure to go back there for more suggestions. Do you have anything to say about a contestant? Do you want to make the case for your personal favorites, even if they are not on the list? Remember, the top five are based on your most popular nominations from the invitation to the theme contestants from earlier this week. Don't just complain about the top five, let us know what your favorite alternative is - and make your case for it - in the discussions below. Cell Five is based on reader nominations. As with most of the five cell posts, if your favorite is excluded, it does not get the nominations required in calling for the job contenders to make the top five. We understand it's a bit of a popularity contest. Do you have a suggestion for cell five? Send us an email in tips + hivefive@lifehacker.com!Photo address by Diego Elio Pettenò. Pitino.
