Pony charges in kedarnath

Expanding Horizons offers Cornell veterinary students a truly unique opportunity to experience veterinary medicine in a developing country. The program offers scholarships to Cornell veterinary students who are interested in veterinary experience in developing countries. Students spend 6 to 10 weeks in a developing country dedicated to veterinary research or practical veterinary experience (this ranges from wildlife rehabilitation to working with local farmers to develop artificial insemination techniques for their milk herds). Some countries our students have traveled to through this program are Ghana, Uganda, Madagascar, Thailand, Vietnam, Honduras, South Africa, Kenya, etc. It is the student's responsibility to identify contacts and projects in the country in which they want to work. However, the faculty and the Office of Student and Academic Services work with students to help them identify contacts. Students can participate in the expanding horizon program at any time during their four years, but given the demands of the curriculum and academic calendar, most students participate in the program during the summer of the first or second year. Learn more and see a map of previous projects. See Horizons Expanding on a Larger Map Calendar 2019-2020 November 13, 2019 Call for Proposals February 21, 2020 Proposals due at the Office of Student and Academic Services by noon on March 27, 2020 Notice of Awards October 31, 2020 Deadline for Reporting 2019 - 2020 Using Camera Trap Photos to Survey Poaching Injuries and Chronic Diseases in Wild Areas in Protected Areas of Malawi Epidemiology of Plague des Petit Ruminants in domestic goats and the risk of transmission to wildlife: Chitwan, Nepal Understanding farmers' social drivers affecting conservation efforts in Nambia Prevalence of canine hookworms in different geographic regions and comparison of cultural and metric influences associated with risk (Cambodia) Clinical, metabolic and behavioral effects of glycerin supplementation in cheetahs (Phnom , Cambodia and Isla Mujeres, Mexico) Equine Sarcon in Nicaragua: Prevalence, treatment and success (Grenada, Nicaragua) Nutrition and behavior in Sika : Analysis of the feeding and welfare of Touris (Nara, Japan) Transversal analysis of the risk factors of canine Ehrlichiosis and determination of the true prevalence of actice Ehrlichia spp. Infection in domestic dogs on Santa Cruz Island, Galapagos Africa Sustainable Livestock 2050: Veterinary Public Health the Food and Agricultural Organization of the United Nations (Rome, Italy) Prediction of the state of infection in drynig off and the effectiveness of internal tit sealants in dairy cows in New Zealand Wyntir and the conservation of Rhinoceros in Mpumalanga, South Africa Gastrointestinal ascarids in Nile farm crocodiles Concentration in immobicized and free African elephants determining a basal population of free domestic cats in Palau detection, Statistical Analysis and Epidemiological Mapping of Tick Encephalitis Infections-Borne in Domestic Animals in Croatia Analysis of Disease Surveillance Methods and Genetic Classifications in Urban and Wild Populations: A Health Approach Exploring Human-Wildlife Conflicts and Clinical Wildlife Medicine at the University of Uberland , Brazil Leptospira Antibiotic Resistance Tests in Chile Read the personal accounts of the experiences of our participants Sarah Dumas (Class 2012) Chelsea Anderson Class 2014) COMMITTEE Dr. Julia Felippe Dr. Jarra Jagne Dr. Paul Maza Dr. Hussni Mohammed Dr. Daryl Nydam Dr. Ton Schat Dr. Jai Sweet Dr. Alexander Travis (President) Expanding Horizons is an alumni-funded program that allows veterinary Cornell students to travel to developing nations and participate in summer projects. Students design their own experiences (such as a research project or internship) in a lodging organization of their choice, and apply for an Expanding Horizons Scholarship to have their experience fully funded! In the past, student projects have covered since the assessment of nutrition in macaws in Costa Rica, cheetah conservation efforts in Namibia and diseases transmitted by ticks in goats in Uganda, just to name a few! Students typically participate in Expanding Horizons for 8-10 weeks, during the summer after their first or second year of veterinary school. However, students wishing to participate in an international project during their clinical rotations can apply for funding for a 4-week international project. Expanding Horizons is designed to train Veterinary Cornell students to be international leaders in conservation, public health, and clinical medicine. So... what are you waiting for? Information about the application process and deadlines can be found on the official website! Click here to read student posts about your Expanding Horizons projects! See the markers on the map below for locations for previous projects that our students have done through Expand Horizons and click here for location descriptions. Read about Expanding Horizons in SCOPES magazine: Monday, October 19, 2015 at 5:30pm at 6:30pm College of Veterinary Medicine at Cornell University, LH2 606 Tower Road, Ithaca Hunting for Zoonotic Helminths in Urban Colombia: Listen to a veterinary student's stories of his adventures by monitoring pathogens, murinos and pigs in Colombia, and get a taste of Colombian cuisine.
