Free online math worksheets for grade 2

The following 2nd grade math worksheets address the basic concepts taught in the second grade. Concepts addressed include: money, addition, subtractions, word problems, subtraction and telling time. You will need the Adobe reader for the following worksheets. Second-grade worksheets have been created to emphasize understanding of the concept and should not be used in isolation to teach a concept. Each concept should be taught using math manipulatives and many concrete experiences. For instance, when teaching subtraction, use cereal, coins, jelly beans and provide many experiences with physically moving the objects and printing the number sentence ($8 - 3 = 5$). Then move to the worksheets. For word problems, students/learners should have an understanding of the computations required and then exposure to word problems are necessary to ensure they can use the computation in authentic situations. When beginning fractions, many experiences with pizzas, fraction bars and circles should be used to ensure understanding. Fractions have two components for understanding, parts of a set (eggs, rows in gardens) and parts of the whole (pizza, chocolate bars etc.) I have, who has, is a fun game to enhance learning. For third grade math, students are expected to know their fact families in addition, subtraction, multiplication and division. With this information, they will be able to solve two-step word problems and equations. In addition, third graders should know how to read and write large numbers through the hundred thousands and know the place value for each digit. Below are a few other skills that a third grader should know. Add four-digit numbers Subtract with regrouping Round numbers to the nearest tens and hundreds Understand two- and three-dimensional shapes Solve word problems that involve time, money, and measurement An effective third grade math curriculum should ensure mastery of each of these concepts/skills by providing thorough instruction and plenty of opportunities for practice. Visit our 3rd grade math scope and sequence to discover how Time4Learning's award-winning, comprehensive curriculum can do just that. In third grade, there are a number of math objectives that your child should achieve. Doing so will allow them to easily learn more complex concepts later. Practicing math facts in the early elementary years as often as possible will help them focus on learning these new skills and understanding more advanced concepts in the years to come. This year's math objectives include: Gain the skills to do mental math Multiply two-digit numbers Divide two-digit numbers Understand, compare and identify fractions Interpret charts and graphs Check out how Time4MathFacts (included in your subscription) fosters strong math fact fluency through interactive and gamified lessons that keep students engaged and mastering addition, subtraction, division and multiplication. At Time4Learning, we understand how critical it is to build a strong foundation in math. Without the proper math skills, students will struggle in later years. Our third grade math curriculum tackles the concepts mentioned above and more. While our materials correlate to all state standards, we strive to ensure our students exceed their academic goals by the end of our coursework. As well, we aim at fostering a love of learning in each one of our students. For parents, we provide an easy way to provide quality education for their children and not have to worry about grading, lesson planning or recordkeeping. Just log into the parent dashboard to monitor your child's performance, print reports for your homeschool portfolios and you're good to go! Below you'll find a list of reasons why many families trust Time4Learning to meet their child's third grade math needs. As a Full Curriculum Comprehensive and standards-based math curriculum includes over 300 activities. Engaging lessons and interactive activities make learning math fun. Printable worksheets provide extra practice away from the computer and help reinforce concepts learned online. Student-paced approach means children can learn important math concepts at a speed that is best for them. 22 chapters cover topics like fractions, money, patterns, probability and more. Activity planners help students stay on track and work independently. Detailed lesson plans provide information on each math lesson and allow parents to preview material. Multimedia-based curriculum is ideal for all types of learning styles as well as gifted students and those with special needs. As a Supplement Math curriculum helps students reinforce what they are learning at school using a fun, online approach Free access to Time4MathFacts allows students to practice crucial 3rd grade math facts. 24/7 access means students can log in after school, in the evenings, or on weekends. Flexibility to redo lessons and retake tests and quizzes. Access to one level above and one below allows students to review second grade math or get a head start for fourth grade. Online format eliminates the need to hire a math tutor or drive to a learning center. No contracts mean families can use the program as long as they need and cancel anytime.
