The digital dash I've seen these bikes comes with a crappy hand dash that doesn't last long, which is another plus. All but carbohydrates ... With modern fuel injection available on almost all new bikes installed on the market starting in 2019 and up, why doesn't it come electronically fuel injected? EFI will connect prices over \$2k for sure. Probably close to \$2,599 or so; maybe more. People probably. not going to pay \$2599-2999 for Chinese 250 at the moment, but who knows, maybe. If the bike had included a CB250F engine with 20hp then maybe we would have been talking about a better bike bike costs 2599 or 2999 price with efi. On radar: CSC - TT250 Moto Aventure ride 2020. I moved money and called and left a message for Jeff to re-return the card, and when I got home I checked my account and there's a hold for Peace Sports, so I think I'll finally have a bike to ask you all a bunch of dumb questions about. damn I can start before the bike even gets here. I worked like a government mule today, everything on me from head to soap hurts, but I tickled to death!!!
