Ak ste with my travels, welcome! I make all my travels on google letters (instead of photos) so I can always update them with the most relevant information. My travels now include several Blue-Green, Gold-Platinum, Sapphire-Emerald, and Obsidian-Harbinger paths with a few Red-Forething Paths also thrown in You can find them here: Please make sure you always view the roads LIVE so I can ensure that you never post an outdated version. I always UPDATE rather than change my ways so you will never be left in the dark before things do next. This worksheet is best viewed on the desktop or in the Google Sheets mobile app. Are you impressed? It's okay, I know it's a lot. If you are new to my breeding trip, I highly recommend you click on the Red Best Way and start there. If you are interested in trying to put together the one that is best for you, I have made a small flowchart to help you. I create paths in pieces so you can make the best decisions for you. Pieces like Blue-Green, Gold-Platinum, Sapphire-Emerald, etc. This flow chat tells you the cost of each trip and which path can go on that trip. Note, for example, that all my Gold-Platinum trips can literally go to any Sapphire-Emerald. As always, if you need your own journey (because your dragons are different from my travels) or if you need help reading and understanding these paths, please reach out to me. My active game names are currently: Red, Orange and TheRedDelilah. I am also active in the Facebook group War Dragons Addicts if you would like to ask for help there! Red To write it in your wiki: <iframe width=100% height=500 src= 105 Likes Hi Red! Thanks for all your hard work. Do you expect any changes to the Sapphire farm? 2 I like just the changes look to be after the grenade mythical. The steps before that look the same, at least on my passages. Thank you Red Amazing as always Thanks for all the hard work Red! One question about AA2 and 3, where does Slax be? I don't see a step for him. Is it a by-product of the next step? I'm still doing some work on these trips to ensure that I have the best roads possible for you. Right now I'm adding to Obsidian on all my existing paths, then I go back and see if I can make any changes to the previous steps, and then I see if I can create some new paths that are better or just as good so y'all have options. Once the title of the letter says UPDATED, that is, I did. It should be done by tomorrow. 8 Like it as always thanks to Red 1 Like Red, Thanks for everything you do! 1 Just @TheRedDelilah're awesome 1 Just like your guide says, it is 191.333 chips for breeding Deci. It's just Shouldn't it be about 140,000? Combo that red used in the icicle path will get you 3 emeralds for 191K, using pyro and thunderstorms. If you only wanted deci and some sapphire eggs/dragons, then this would be the 143k amount you mean using 2 grenades. 1 Like Thanks To Red for all the work you put into this would be lost without her. (And even with your travels it takes me 2 breeding events to get Hau) Keep up the good work Red and thank you for all the time you put into it. FyrKat Red, I recently started a new account. Lower-level farming opportunities have changed. For example, they have added Drude to almost every low level combo. I can only guess at the next change, but drude became my first blue. I went through all the breeding (and were testing). I just decided to skip some of it in the idea of getting orange rather considering most people level quickly at a low level. 2 The likes of Red have always contributed in a positive way to my enjoyment of the Dragons war. Thank you as always Red 2 I like @TheRedDelilah. I have used your trip and website many times to get me to where I am. I used your paths to create for myself a breed path table. I just got my first Emerald and then found out that I could skip one of the steps because of a simpler combo. Do you want me to send you information, or do you prefer to find everything on your own? 1 Like the following → →
