P. Singh Publishers: Jayne Brothers Publishing Year: 1st Edition, 2008 Languages: English Paperback ISBN: 978-81-8360-074-3 This book provides general information on the science of materials on the important relationship between the structure of metals and their properties. This knowledge helps engineers design and synthesize new materials with the necessary properties. More stress is given to provide a theoretical and descriptive basis for understanding how structures are controlled and the mechanical properties of metals and alloys. Materials are of interest to all scientists and engineers. Today, material sophistication is growing exponentially, affecting advanced engineering and technology. The implications also benefit ordinary people. All sections of the industry, including filters, motor mechanics, manufacturers, manufacturers and welders, strongly feel the need for new materials. The main purpose of this book is to provide general information in material science about the important relationship between the structure of metals and their properties. This knowledge helps engineers design and synthesize new materials with the necessary properties. These books are used by students from leading universities, laboratories and universities. The interdisciplinary field of materials science, commonly called materials science and engineering, includes the discovery and design of new materials with an emphasis on solids. The intellectual origins of materials science come from the Enlightenment, when researchers began to use analytical thinking from chemistry, physics and engineering to understand ancient phenomenological observations of metallurgy and mineralogy materials science standards. Sharing is caring. Suggestions for viewers: If you're serious about your studies, don't consider e-books or books in a PDF. The reason is that electronic devices distract you and cause tension while reading ebooks. Kindly, switch to a hard copy of this book and officially buy it from the publisher and utilize your potential efficiently and confidently.
