All rights reserved to Showtime and related marks are trademarks of Showtime Networks Ltd. ViacomCBS. Showtime at all times is accessible for viewing only in the United States and its territories and property. October 26, 2020 version 3.6.13 I use apple TV to show showtime. It works perfectly. From time to time I have to retract it but I guess it might be because the app is up to date or something. However, I'm not having any problems with it at this time. I changed my rating from one star to five stars. I just downloaded this app to stream with my Roku. When I try to sign up, I keep getting an error right after I agree to the policy. It won't go any further. This tells me that if there is a problem before I even get to use it, there will be some serious problems with the app as described by many users who gave it a low rating! Thank you for taking this to our attention! We hate to hear about this, and we want a chance to talk to you. That we can help solve this! Please showtime.com/help where you will find customer support contact options. Just a warning. This is one of the worst privacy policies and usage terms I've ever read. Read carefully through them. When it comes to everything you do online with your phone, they track it, store it and share it, once you agree to their service. So it's now open information for anyone Showtime decides to share it with, including but not just web browsing, online purchases and all the online activity on your phone. This information can be shared with your contacts on Facebook, Google and any other companies showtime has an agreement with at this time or in the future. They indicate that you can adjust your privacy settings in any of their partners. However, you cannot adjust your privacy settings with them. And of course you'll have no idea how many partners they're sharing your information with at all. Unbelievable, I love showtime content but they lost me as an online customer and until they offer the ability to choose to share your information with their partners, nothing in my house with using this app. I would give 0 stars if it were possible to sign any form of privacy just to view content online that you can already watch at home. Totally insane. We'd like a chance to talk to you even more and see how we can improve our SHOWTIME experience for you. Please showtime.com/help where you will find customer support contact options. Wow from reading other reviews I believe showtime is using this app to sell our information. Here's why. Someone mentioned the app's permission and terms of service gives them access to a lot of personal information they can use to make money that's redundant for it to be needed. 2. You must have the app to play smart TV. There's no other way. People mention that activation must be restarted every week or so. Here's how the app saves to your phone. Gives you access to view all your sensitive data in time. Bravo Showtime. Big money makes an idea!!! I'll check with others to see what they think of it. Really uncomfortable you need to download an app to activate a device. Other providers have a simple Web page and this operation. You want me to give room on my phone, that's crazy. My stepmother doesn't even know how to install an app either. I'm sure a lot of people tried to turn on their TVs and failed and stopped out of frustration. What if your misfortune and your phone is broken? Sorry, no phone. Older people also sometimes have flipping phones and no data. Whoever thought it was a good idea should be fired. Ok it's great to have it as an option but follow any example from other networks and use a webpage. People are... With. If you want to share specific details about your SHOWTIME experience, we want to hear it. Visit showtime.com/help where you can find contact options for customer support. We look forward to your feedback. In the App Support privacy policy to access SHOWTIME at any time on your streaming device or smart TV, you must have a SHOWTIME subscription from a TV provider or participating streaming service, along with a high-speed Internet connection. To run SHOWTIME at any time: Launch the SHOWTIME Anytime app on your SMART TV, streaming device, or Oculus Go/Oculus Quest navigate to any program and choose Run or choose Play from the Settings menu. After you see the code displayed on the screen, visit showtimeanytime.com/activate in your browser using a computer or mobile device, enter the code displayed on the device you want to play, and click Send if you haven't already connected to SHOWTIME at any time, You'll be asked to do this using your TV provider username and password or streaming service account A success message will automatically appear on the screen, and you can immediately start using SHOWTIME Anytime NOTE: If your TV provider or digital streaming service isn't listed, SHOWTIME Anytime isn't currently supported as part of your subscription, or access to SHOWTIME Anytime on your device isn't currently available. If your TV provider does not support authentication with this device, you will be prompted to send a message. If you're having trouble signing in to SHOWTIME Anytime, or other problems with your username or password, contact your TV provider or digital streaming service for assistance. Showtime at all times is one of the spill application that is accessible on many stages out there. This is one of the most obvious benefits upon request. It's totally free assistance with a Showtime subscription. Along these lines, there is no additional expense for Showtime at any time. Showtime at all times is open for review exclusively in the United States and its regions and assets. Savvy TV Box customers can run Showtime at any time by visiting the content store on their smart TV. It offers a variety of acclaimed unique TV arrangement including Homeland; Billions, Chi, Ray Donovan, I'm dying here, the novel, shameless, and the upcoming Twin Peaks arrangement.You can use it by installing on Amazon Fire TV, LG TV, Chromecast, Samsung TV, Apple TV, Android TV, and much more. You can use Showtime on any device, no matter which one you use. Showtime at any time features you can watch what is right going to live on both SHOWTIME East and SHOWTIME West and basically switch channels according to the early regulations. It helps sort and see your favorite projects on Showtime Anytime.You can watch the program again where you've been detitted from another project We can appreciate the highlights of subtitle shutdown and parental control. Therefore, start Showtime at any time, and you can make them on a decision gadget like your tablet, phone, TV, or even your COMPUTER. Launch the SHOWTIME app anytime on your streaming device or any other smart device. Select a program of your choice and click Run or Run on the Setup menu. While you see code displayed on the screen, just showtimeanytime.com/activate your browser using your computer or mobile device. First, sign in with your account on this computer or mobile device. Then, enter the code displayed on the screen you want to play and click Submit. A message will be displayed after the device is successfully turned on on the screen. These were the top steps when processing playback on Showtime at any time. This process depends on showtime activation code at all times, which must be filled in to activate a device. If you can do this or face any error message during this process, you can speak directly to our representatives, they will clear you up soon. Source:
