Jandy levolor k 1100 manual

● Touch ads to enlarge ads Thank you for your participation! * Your assessment is very important to improve the work of artificial intelligence, made up of the contents of this project Jandy Levolor Water Level Management System K1100CKC Levolor Water Supply System electronically maintains water levels in swimming pools, spas, fountains and ponds. It can be used anywhere a constant level of water is necessary to maintain a beautiful appearance and protect the device. Easy to install on new or existing pools and spas, the Levolor system does not require structural modifications for installation. Levolor K1100CKC System Features: Wall Mount Control Sensor - Dual Style with 100 Foot Cord 24 VAC 1 Solenoid Valve Control Wired 220 Volt from the factory and can adjust the field for 110 volt installation. Three LED indicator lights - Electric, sensor and filling. No moving parts No extra containers in the deck or pressure fill lines under deck. The casing is waterproof and suitable for mechanical room environments. Ideal for swimming pools, spas, fountains and ponds where evaporation and splashing are common. Real-time order ensures against excessive and hidden leaks. ETL listed. The Levolor K1100 series water level management system detects low water conditions and automatically replaces water at pre-set levels. Can be used in any situation where the right water level is desirable. Ideal for new or existing pool and spa systems. Easily maintain water levels without faucets - With Levolor, you'll never need to fill the pool with garden hoses. Levolor replaces water in your pool lost by evaporation and automatic splashing. Sophisticated electronics - Levolor's unique electronics compensate for the waves, which will not fill your pool and feel the water level without moving parts. Protect equipment and appearance - Low water levels can cause permanent damage to your pool equipment. Keep your pool looking and performing at its peak with Levolor. Known as:Zodiac K1100CKCJandy K1100CKC SL6550 Levolor Water Leveling Systems brochure H0303600 Jandy K-1100, LX2, K-2300, & LEV110CK/2G I/O Manual SL6550 Levolor Electronic Water Leveling System Brochure H0303600 Jandy K-1100, LX2, K-2300, & LEV110CK/2G I/O Manual Electronic Water Leveler Model K-1100 Levolor is the alternative of contractors on mechanical floats; because it is hassle-free, easy to install and has no moving parts. LEVOLOR is a computer-controlled device that detects low water status and automatically replaces water at pre-set levels. LEVOLOR works well on new and existing pools and spas. LEVOLOR can be used in any situation where a suitable level of liquid is desired (i.e., swimming pool, spa, aquarium, pond, reservoir, reservoir, water cooling tower, etc.). IMPORTANT SAFETY GUIDELINES 1. READ AND FOLLOW ALL THE INSTRUCTIONS. 2. WARNING: reduce the risk of injury, do not allow children to use this product unless they are closely monitored at all times. 3. SAVE THESE INSTRUCTIONS. 4. The sensor wire must be continuous and not connected. Call the factory with any questions: 1-800- 844-8514 5. Weld all low voltage wire connections when possible and always use grease-filled wire nuts on low voltage connections.
