Top droopsnoot's Profile Too Much Time On My Hands Posts: 2911Joined: 05 Sep 2002, 17:11Location: Is there an updated version of the TT manual covering the Roadster 225 2000? The reason I ask is that during the Christmas break mine showed a slab of yellow oil, some waves under it and the word MIN. For me, this means low level of oil, but during the research in the manual it specifically says that the only symbol of oil laotia is red, which means low oil pressure. It is therefore stated that no warning is given about the level of the oil, it is necessary to periodically check the level of the oil. Asking the retailer (and later checking here) it seems that it is actually a low warning of the oil level. I was wondering if there was anything else (apart from the waist of the cam belt) that the printed manual omits. I called my local Audi garage yesterday because the car was not available with any service manual/service manual from the owners, to find out how much it would be.
