This will not be one of my proud moments at the forum. The more I have to do general maintenance projects on my own, the more I realize how ignorant I am about the location and names of many parts under my mica-colored hood, and throughout the car for that matter. I read very useful here referring to troubleshooting problems, and too often it dawns on me as I am the foggiest where the part is not talked about. It's not like I'm a complete idiot, but I just missed years of class where basic engine components were taught. Basically when I bought this gem a few years ago that tended to get my hands dirty and do as much as I could on my own first hit me. When I read conditions like EGI, CAM, CAS sensors, and way too many others I scratch my head right from the start. Heck, I just changed the liquid in my power steering reservoir a few days ago and the only way I understood where it was located was because of a removal process (no, that's the brake fluid, which is one of the clutch fluid... Here's the cooling reservoir... It has to be this one). So my question is if anyone here knows the basic, easy to read chart for NB that shows where the part on the car and the name Type of Mata parts for image Dummies that I can use as a reference? It would be worthwhile helping me down the road if there was one, and rescuing you members more aware of things like this. The next time Goreth writes, Moving the vacuum line for the amplifying sensor of a light will be turned off in my head instead of a cloudy question mark. September 2008, 10:58 #2 Gear II Join Date: July 2007 Location: Whitman, MA Post: 124 for basic liquid checks, lamp replacements, and maintenance specifications, this should be listed in the owner's manual. If you have one, order one through your Mazda dealer parts department. When you are ready for the next step, buy a factory workshop manual. They are expensive, but usually pay for their first or two in repair. Again, order one through the Mazda parts room. I think if you go to the garage section Miata.net there are parts stored in pdf. These catalogues can be difficult to decode if you have a professional, let alone a weekend wrench, which is why I mentioned it last. Of course, if you still feel lost after checking these resources, don't hesitate to pick up a public auto repair textbook at Borders or Barnes & Noble. These will explain how all vehicle sub-systems work in a car. Or you may be able to take a basic auto repair class at your local business school or community college. These classes are usually taught at night specifically for working adults who simply want to know how a car works, enough that they can do their maintenance. Finally be patient! It never suddenly wakes up, an ace technology takes time, study and experience. There's always something new to learn. \_\_\_\_\_ 1999, Triple Black, Touring & PEP (RIP 3/08) 2001, Triple Black, Convenience Pkg. 22. September 2008, 11:35 #3 Gear IV Join: November 2005 Location: Brockville / ONS: 1,428 I suspect that 2000 is almost clone parts since 1999. Using it as a base, check out: Most issues are there and every now then you can select one or two pages and see what parts make up your Miata. Enjoy, since you are already curious this level will continue your comfort in reading potential solutions to a problem you are researching. Have fun, it is! \_\_\_\_\_ 1994 - M-Edtion 5MT (sold) 1999 - 10AE (927) 6MT - (sold) FL 2003 - LS Garnet Red 5MT - (traded) ON 2011 Dolphin - Gray GT SV 6MT - ON 22nd September 2008, 11:54 #4 Gear IV Join: Sep 2007 Location: Atlanta 2000 SE: 1,082 Thanks, Mugseyone. Maybe I should have been a little clearer. You can see where someone got the idea that I should even get near my car to do any work. I'll give him another shot so far I've managed to pull off repairing things like replacing my stock header with Header 03, changing all my fluids, including oil, trans, diffraze, brakes, clutch (slave cylinders too), replacing broken power antennas, changing fuel filters, replacing leaking valves covering gaskets, take-off and cleaning above the intake manifold, and a few other usual jobs. So I'm not completely clueless where certain parts are. What I was looking for was hoping for some kind of useful chart that showed some lesser-known/obvious sections specific to the NB model years I guess was often referred to in troubleshooting topics. I have a owners' manual (it should be noted that to put liquid power steering), but while it's not for profile information and things like where to find your tire jack it is not a lot of help for my more detailed questions. Your offer of buying a department store manual is huge, but unfortunately the high cost makes it impossible for me now (the same to attend night class). Just thought there might be a good picture floating where I was somehow missing out on my searches on the forum. "on a related note... If someone has an accurate picture of inserting female organs I can use that too. His wife appreciates 22nd September 2008, 11:57 #5 Gear IV Join: September 2007 Location: Atlanta 2000 SE: 1,082 Poylekt, dftiz!!! Thank you so much! 22. Enjoy, since you are already curious this level will continue your comfort in reading potential solutions to a problem you are researching. Have fun, it is! I printed and put in a binder all the pdf pieces for 99 years. I owned 2001 as well as printed updates for PDF 01-02 also listed on the same page. Except for minor engine and body changes, most parts will be replaced between the years. Those PDF come in very handy not only for part numbers but also assembly arrangements. Exploding charts are a bonus. This saves me a lot of escalation with the section section if I get there ready with the page. The total printed binder is about 500 pages. Well worth it to me and a great addition to my library..... Jon 01 LS \_\_\_\_\_ That's all..... Quite gnarly dude !!!!!!!!!!!!!
