But it wasn't all about hardware. Apple has also released iOS 13 Golden Master, making iOS 13.1 a major focus for us beta testers. Now, Apple has just detected the third public beta, then ... more Apple Card, invaded by Apple on credit cards, should be released this summer. There is not yet an exact date for which you can apply for one when iOS will support it, but it's getting closer. Apple has just released iOS 12.4 developer and public beta 7, which means we're almost there ... Apple's upcoming iOS 12.4 isn't the most exciting release of the company on its surface, given the imminent fall of iOS 13. However, anyone interested in Apple's more working credit card, Apple Card, will need iOS 12.4 on their iPhone to use the card, and that day seems to be ... Currently, Apple is testing two versions of iOS. On the one hand, you have iOS 13, buggy but full features. On the other hand, iOS 12.4. The latter just received an update to the fifth developer and public beta versions, 13 days after the release of iOS 12.4 developer beta 4. While the AP ... Yet While iOS 13 isn't ready for public beta testers yet, Apple is still testing iOS 12.4 out and you can install this right now on your iPhone. The latest version, iOS 12.4 Public Beta 4, was released on June 12, a day after its developer. Since iOS 12.4 developer be ... More With the beta 13 iOS developer in full swing, it may be easy to forget that there is a completely separate iOS beta cycle still running at the moment. Yes, iOS 12.4 is still in beta, and unlike iOS 13, it's available to the public for testing. This fourth beta update comes exactly tw ... More Smartphones and laptops constantly send Wi-Fi radio signals, and many of these signals can be used to track us. In this guide, we will program a cheap IoT device in Arduino to create hundreds of fake common name networks; This will lead to devices nearby to reveal ... more When I browse apps, I often download at least one or two bad apps that have either lied about their functionality or been riddled with ads. These applications, while not as harmful as malware, can still be a big headache. It made me think about other bad applications ... more Default screen timeout on most Android devices is 30 seconds. This usually offers a good balance of usability and battery saving, but sometimes you need the screen to stay longer. For example, practically every time I try to show something on my phone to someone else ... It wasn't that long this time. Apple released a public beta 3 for iOS 13 on Thursday, July 18, just one day after launching beta 4 developers. For context, Apple took five days to seed public beta 2 after the release of Dev beta 3, so it's a pleasant surprise that the latest ... more We are pumped for iOS 13 and all the fresh features and changes that come with it. Developer beta 3 came with new features in the double digits, including AR eye contact in FaceTime and customizing the size of the mouse cursor. Developer beta 4, released today, there are a few more additio ... still the third beta developer for iOS 13 has been out since July 3, and while devs have had fun exploring all features, those of us on the public beta have sat on the sidelines working with the public version of dev beta 2. But we don't have to wait any longer as Apple just rel ... more On July 3, Apple pushed iOS 13 13 beta 3 for iPhone, and there are many found hidden within. New FaceTime setup, more Arcade details, full-screen scrolling photos everywhere, noise canceling option in Control Center and a new tagging tool - and that's ... there's no doubt that iOS 13 has dominated the conversation around the Apple community this month. After announcing and releasing the first beta-developer, we iPhone users have a treasure trove of new features and changes to explore and discuss. Now the fun continues with iOS 13 ... More It's a strange time for us iOS beta testers. As Apple prepares for the general release of iOS 13 on Thursday, it's also beta testing that successor to the software, iOS 13.1. An iPhone updated to iOS 13 on Sept. 19 will have only 11 days before seeing 13.1 in its software update ... more Apple has pulled out quite the conundrum in anticipation of its big iPhone, which was unveiled next week. Its latest update for iPhone, iOS 13.0, is only on the horizon, going through eight beta versions so far. Yet, before the official software of this software, the company started beta ... even when Apple takes the stage next week, we have no idea what version of iOS will be released. For months it seemed like we would, of course, see iOS 13 sown on our iPhones. Now, we're not sure if Apple will tut iOS 13 or iOS 13.1, as the latter is now the focus ... more rooting. As an Android user, I'm sure you've heard the word once or twice. According to Kaspersky, 7.6% of all Android root users — but about 92.4% who did not, we wanted to talk to you.
