So post-game war and mobile strike and knowing you have to pay to play, which was ok at the beginning to say that they drop new updates every day instead of once every few weeks to let others reach. Well this game will give you so much more then having to buy a package after the package. When you task you get some great rewards that will help free play players. Sometimes I buy sometimes I don't and yet I'm still able to score within the top 10 of the whole city where I am. The only thing I have questions and concerns about is the gold payouts rewards individual events or hell event should be a little more. Also, everyday crime, if you rank in the top 50 you should be able to get more than 80 golds. Now that comes with buying packs for others to score in the top 3, where the gold payout is much better. anyway played close to 2 years and do not want to touch another game. Mafia town keeps up the good work. Don't let greed pass such a good game of passing time. But don't offer more gold as the event wins and more speed up. Also, more events with gold tickets or coins used to combine vouchers would be fantastic too. thank you all for developing one bad bone game. Dear player, Thank you for a lovely comment. It means a lot to us! If there are any questions or suggestions, please contact us via Facebook at MafiaCity.EN, via our Line account @mafacitycs, or by mail mafia@yottagames.com. Have fun playing! (\*^\_\_^\*) I have to say it's been one of the biggest games I've played in a while. I've been playing since he was 18 close for two years now. There are some questions I've noticed and I'm late for big questions. I enjoyed the game so much I have created many different accounts to keep me going for extra Parmesan everything else. But since late every account has now been banded and I have no way to get into them and I have no way to start a new one. I don't remember which cities all my bills were acceptable in. All I'm looking for some results to get my account fixed so I can play again from now I can not play the game interview developers release Apple ID that is used on your server so I can New. It's a great game. If you want to get ahead of the game quickly yes you don't have to spend some money on some packages of great some pantry very expensive. I applied the game without iron, which takes a long time to get anywhere and I've also spent on other issues. Or cities so all the big game I think you could clean up and have some small issues fixed. I think the story line could be a little better I won't notice if the story goes maybe it stops talking about storyline changes so I think if you guys create a better story line it would be great power and all I'd like to do is be able to play again. Period. Thanks to the twisted one So I've played a lot of these games, there's fun to see how far you can get on your own. Now I play for a free reason, this is a free game and that usually does not work out for me, I get a sniper by lvl 30 or clan / guild runs me over points event. For a long time I thought these games were just a way for companies to make easy money. This game has really been a different story for me, the clan I joined actually talk to each other and want to get stronger, developers send me tips and event messages every day, the whole game is fun again for me. Now there is a salary to win the game I say that if you have a job where you watch the machine run like me it is a fun game to jump and have fun, the best part is I have not spent dime and do everything for my clan and all the little quest game throws you I have got over 5k gold. So this is my honest review, not a bad game at all, gives all kinds of people (free players, money dropping top rank players), something to enjoy in normal work.
