Copyright 2020 InfoSpace Holdings, LLC, System1 Company We need a new soundtrack for the office, something strong enough to pry out the free earworm that is Jingle Bells as we prepare for the tax season. Our pick? Only the Lonely, organized by Nelson Riddle and recorded by Frank Sinatra on the same name. Added bonus: LP's cover inscription is the inspiration for Riddle, a brush script font that is going to help us stylishly organize a mountain of income. Riddle is the work of designer Mario Arturo with the help of Harold Lohner of Harold's Fonts. Among them, designers captured the spirit of the font namesake, master music arranger Nelson Riddle. Brush strokes are reflected on high notes, bounced above and below the end, and still manage to arrange lyrically on the page. Only seven letters from the LP cover inspired 32 characters in this TrueType font set. The final set remains faithful to the original album. Imagine Frank Sinatra's face dramatically illuminated and forming in Pagliacci clown makeup, complete with pink lips and matching pink tears line striping across one eye. Compare the feeling of this tear line with the extreme verticality of the inscription. Now take inspiration through 25 more letters. It's not easy to perform, which probably explains why the font doesn't expand to capitalization, numbers, or punctuation. Despite its soulful origins, Riddle's mood is far from bleable. There are alternatives for six characters, including charming pairs of f and r. The characters compose with loopy hilarity, even as we write words like adjusted gross income, mortgages and alimony. Who needs a hat and a dot when you're trying not to cry about the injustice of love and taxes? Thanks to Arturo and Lohner, tagging file folders is hip again! The puzzle is licensed for personal use only, but this is not the only limitation. This font display will not sing along with serious text tasks, but will swing in short bursts in point sizes as low as 24 and really start singing on 48.To think that the hunt for a new soundtrack has led to new love! Riddle, you put this amazing back to work. We're so happy we took you for a ride. Note: To use this font, expand the folder and install the TTF file in the C:\Windows\Fonts folder. Note that fonts won't appear in your apps until you close and reopen them.-- Kate Godfrey Note: When you buy something by clicking on the links in our articles, we can get a small commission. No uppercase letters, punctuation, or numbers. A man walks into a rooftop bar and sits next to another guy. What do you drink? He's asking the guy. Magic beer, he says. Oh, yes? What's so magical about that? Then he shows him: He's douche some knocks down the roof, flies around the building and finally returns to its place with a

triumphant smile. Amazing! says the man. Help me with some of this! The guy grabs a beer. He shot her down, jumped off the roof, and fell 15 stories to the ground. The bartender shook his head. You know, when you're drunk, you're a real jerk, Superman. Let's ignore for a moment whether or not that poor rube survived his fall (if it makes you feel better, say Trampoline Man waiting for him on the ground). The real question is: Did you find this joke funny? Sick? Maybe a little of both? According to a new study published in the journal Cognitive Processing, your reaction could indicate your intelligence. In the paper, a team of psychologists concluded that people who appreciate dark humor-defined humor that treats sinister subjects such as death, disease, deformity, disability or warfare with bitter fun and presents such tragic, stressful or morbid topics in humorous terms-may have a higher IQ, exhibit lower aggression, and resist negative feelings more effectively than people who turn their noses at it. If you can answer these Mensa quiz questions, you are probably a genius. To test this correlation between sense of humor and intellect, researchers had 156 male and female participants read 12 bleathly cartoons from the Black Book by German cartoonist Uli Stein. (One of them, which paraphrases a classic joke, shows an undertaker reaching deep into a corpse as a nurse muse; an autopsy is completed, he is just looking for his wristwatch.) The participants indicated whether they understood each joke and whether they found it funny, then took several basic IQ tests and answered questionnaires about their mood, aggressive tendencies and education. Here are 75 short jokes anyone can remember. The results were remarkably consistent: Participants who both understood and enjoyed dark humor jokes showed higher IQs and reported less aggressive tendencies than those who didn't. By the way, participants who least liked humor showed the highest level of aggression and the worst mood bunch. The second point makes sense when you consider the widely studied health benefits of laughter and smile: if you are not able to greet negativity with playful optimism, of course you will feel worse. But what about the connection to intelligence? According to the researchers, processing dark humor jokes takes a little more mental gymnastics than, say, processing a knock-knock joke-it's a complex information-processing task that requires analysis of multiple layers of meaning, while creating a little emotional distance from the content by registering as a benign instead of hostile. That emotional maneuvering is what distinguishes dark humor jokes as opposed to, say, puns that literally pit your brain right and Hemispheres against each other as you process one word are more meanings, but usually do not force you out of your emotional comfort zone. Tina Fey sums up the difference pretty well: If you want the audience to laugh, you can dress a man like an old lady and push her down the stairs. If you want the comedians to laugh, you're going to throw a real old lady down the stairs. Takeaway: Pretty much every joke that relies on puns will put your brain into work-dark humor jokes just require a little more emotional control to earn a laugh. Give your brain a spin with these jokes proven to make someone sound smart, or, if you want to test your black humor knowledge, consider following the dark jokes from reader's Digest comedy crypt to perform your hardened funny bone:• 'I'm sorry' and 'I'm sorry' means the same thing.
