So if you want to find the right hack then check the reviews. Hopefully this guide to gardenscapes hack use will help you get enough resources and is the best player easily. It's a reliable option and effective too. Make sure you use it by following all the steps otherwise you can end up solving problems lately. Ever dreamed of creating your own garden? Now is your chance! Gardenscapes is a match-3 puzzle game with a garden twist. As you complete the levels, you earn a lot of stars by putting a lot of cleaning in different gardens around. These gardens have seen better days, and now it's up to you to restore them to your former glory! Whether you like match-3 games or just love gardening, Gardenscapes is a new approach to the classic match-3 formula. Let's start with our Gardenscapes cheats, tips and tricks strategy guide! 1. Look carefully at the gnomes on the levels where you need to uncover gnome statues, you can carefully look at the species to see where they can be hiding. If the grass is covering the spot where you think the gnome may be hiding, make sure to cut the grass into its thinnest layer of matching fruit and flower. In the layer where there are holes, if you see a bright white color peeking through the holes, there is a gnome! 2. Look for match-4s! We know it's a match-3 game, but you're going to have to get into the habit of matching more than that! Difficulty jumping match-3 games usually happen late in the game, but it happens in Gardenscapes as soon as level 8. Do not rush through the levels; Don't hurry. Do not try to do only three - examine the board and see if you can setup up to four circuits. You will soon run out moving if you are not always thinking one step forward. 3. Save your gold shovel power from all power ups, if you are going to buy one, you should get plenty of spades. Shovels allow you to dig one tile where the board is located, this can mean the difference between beating level and losing. Other power ups just start you up with explosive or rainbow power already on the board, which can give you a head start, but can be easily wasted. Instead, we recommend simply sticking with shovels. 4. Hang on to the rainbow blast when your rainbow blast counter takes all the way and slice the shapes on the board, resist! We know it's tempting to turn it off right away, but usually it's a good idea to keep on hold on for as long as you really need it. Let's say, for example, you're trying to get a gnome out of a little nook in the corner of the board and you can't just get the berries you need to get one out of the way. This is where the rainbow blast comes and opens the way for you! 5. Create boosters It goes hand in hand with tip #2. Your main goal in this game is to create matches as many tiles as possible in matches that hit booster blocks. These special blocks are the ones that will help you win those challenging levels because they can reach very difficult to reach places. Even better, if you combine two amplifiers together, you can create a super-effect that increases their power. So if you're still moving left and chances of bringing two boosters together, it might be wiser to wait a little while before you do it in order to get all those advantages! 6. Rainbow Explosion is your friend And he also goes hand in hand with all the tips above. The thing is that you need this Rainbow Blast and you can activate it by detonating more power-ups in the game. The more, the better and the faster, the better! 7. Restart the challenging levels without losing lives This is an important tip for those at an incredibly complex level that requires everything that falls into the right place if you want to win. Look at the level of the game board as soon as you start and if you don't like the tiles that you get, or the location of the amplifiers, just restart that level. If you do this before you take one step, you will not lose your life! To do this, just tap the Gear icon in the game and exit the level, then run it again. It's a little time and you need a few tests before everything gets in place, but it's really useful and totally worth it! 8. Add as many friends as possible! It's almost common sense, but I have to say that again: the more friends you have in Gardenscapes, the better! Because friends send you a life and you can never say that you have too many lives in this game, especially when you reach the more challenging stages! 9. Do not issue coins further! You only get a limited amount of moves and it costs a fortune to do so. In most cases, even if you spend money on it to continue, you will not win the level. So it is better to coins for other things. If you are 100% sure that with a move or three you will definitely beat the level – and if Talk about the level that gave you a ton of headaches, then you should really skip the coins to continue. But if you do, make sure you make them run and you beat that level because the coins are not cheap! 10. Create matches at the bottom If everything else fails and you don't have great opportunities to build boosters or get close to completing your current missions, the best step you can do is to create a match at the bottom. This way you will end up moving a lot of tiles on the board and you can get lucky and score a few free matches and get even some amplifiers for free. So it's always a good idea to create a match at the bottom. That's all Gardenscapes mobile phone. If you have other tips or tricks to share, leave a comment below! Below!
