## Age of wushu random encounter

Random Encounters Some things of age in Wushu are not planned, but experienced. These experiences are mysterious and can happen without warning. You could run into a bit of serendipity or find yourself in a bit of trouble. Some of them could confer a series of life changing martial arts skills without the player having to lift a finger. Or you could set yourself out, only to receive a reward as valid as a simple rock. These are random random, and can leave a joyous player or see. There are two types of random encounters: Random type and Fixed Type. Random type • Each card will have a random encounter similar to a lotto. A random player will be selected from the map and an unknown NPC will begin following them. • You will be able to trigger a random encounter with certain NPCs every day. However, once you talk to this NPC they will go about cooldown and others can't talk to them. The fixed type NPC Type You will be able to find this type of NPC in hidden suggestions in mind. However, you need to complete certain requirements to trigger random encounters from this type of NPC. Fixed Task Type This type of random encounter involves falling items in the world. When a Fixed Task item falls, you must find the corresponding NPC trigger the random encounter. No further conditions are required. Tip: To start a random encounter, find an NPC with an antenna icon above themselves. Random random random is the result of your interaction with NPCs and the world, so make sure to completely gratitude with gossip players from the age of Wushu's social system. After choosing a story, the game will give players some guided work. We recommend you do them, as would result in random random! Random encounter is a feature of Wushu Age, mainly aiming towards subscribers (VIPs), where a character with an orange orange blob above your head is approaching you. Your system's log will get the following message: [System 00:00:00]: XXXXX XXXX says: Come on here quick, I have something to tell you! (Note: The AP left after 5 minutes.) However, it often gives little suggestions as to what you'll receive – and the effort often doesn't match the reward. Therefore, here is a list of the names and what rewards they provide. Rank the item is a column for sorting reasons, making it easier to quickly check the best and worst items (and the characters).
