If you find an inaccuracy in our FAQs, please let us know using our contact form. My mechanical watch works fast, what can I do? Verified this can be caused by exposure to a magnetic field. It can be solved by a demagnetization process carried out by a professional watchmaker. This was helpful (260) What do am and PM represent? Am checked means Ante Meridiem and indicates that the time is before noon. PM means Post Meridiem and indicates that the time has passed noon. This was helpful (236) What is a 'Chronograph'? Verified A Chronograph is literally a time writer. The term is used to describe clocks and watches that count the time of day, as well as measure a certain period of time, such as a stopwatch. This was helpful (160) A battery in my device is oxidized, can I still use it safely? Checked Ja, the device can still be used safely. First, remove the oxidized battery. Never use your bare hands to do that. Then clean the battery compartment with a cotton swab dipped in vinegar or lemon juice. Allow to dry and insert new batteries. This was helpful (146) What is a quartz movement? Watches and watches checked with a quartz movement are driven by a battery. This sends an electric current through quartz crystals that will vibrate. These vibrations are transmitted to movement. Because vibrations have a fixed frequency, watches and watches with a quartz movement are extremely accurate. This was helpful (116) What is GMT? Checked GMT stands for Greenwich Mean Time (sometimes called UTC, defending Coordinated Universal Time). It's longitude 0 time, which passes through Greenwich near London.
