Mr Jacob Nicholson | 11 April 2019 | Firestick, How to | Amazon Fire Stick is the small streaming device that allows users to stream lots of content on their TV. Apart from streaming it also allows users to play online games using FireStick. Any gadget that has an operating system needs to be updated, it is even necessary when it comes to internet operated gadgets. This ensures both device functionality and security. FireStick works based on the Android platform and it receives regular updates. Most updates are automated, with the device automatically updated when the update is available. Recent updates have included some new features, such as the upgrade to Fire TV 3 allowing you to watch local cinema aisles. It also fixed some bugs that were affected by device performance. Read below to learn how to update FireStick. How to update FireStick FireStick Updates The following are the latest updates that are being installed on Amazon Fire devices. When the new update is available, your FireStick automatically downloads and installs it. To update FireStick manually, follow the guidelines below. Amazon Fire TV Stick 4K: Fire OS 6.2.6.3 (2047421828) Amazon Fire TV Cube: Fire OS 6.2.6.0 (2047291524) Amazon Fire TV (3rd generation): Four OS 6.2.6.0 (2047291524) Amazon Fire TV (1st, 2nd generation, Alexa Voice Remote, Voice Remote): Fire OS 5.2.6.9 (632552020) Fire TV Stick Basic Edition: Fire OS 5.2.6.8 (630508320) Related: How to download and install Sling TV on FireStick? How to manually update FireStick? First of all, FireStick itself installs the new updates when it becomes available. If you want to download and install the update manually then follow the instructions below. Note: This guide will work for Amazon Fire Devices such as Amazon Fire Stick, Amazon Fire Stick with Voice Remote (1st & 2nd Generations), Amazon Fire TV (1st, 2nd and 3rd Generations) and Amazon Fire TV Cube. Step 1: Go to Settings on your FireStick. Step 2: Go from the Settings window Go to My Brand TV (or device in some other versions). If you own an older version of FireStick then you may have to choose System instead. To update FireStick Step 3: Then click the About option. How to update FireStick Step 4: On the next screen, you'll be shown with all the information about your FireStick. Here you can find the running version of your device. Step 5: Then click the Find System Update option. The device then searches for the update. If available, it will be automatically downloaded. Step 6: After downloading, select Install System Update. To update FireStick Note: If you do not select the Install option automatically installs the updated when you restart your FireStick. Related: How to download and install MX Player for TV? Final Thoughts Update FireStick gives you a stable performance on your device. It also improves security and fixes errors on existing updates. It is recommended to keep your Fire OS up to date. When you update FireStick, make sure you have a stable Internet connection, and don't turn off the device when you download the update. Hope we've covered everything about FireStick Updates, follow the above guide and make your FireStick quick and layer-free. Thanks for reading this post. For further queries, leave your comments in the comments section below. It's important to know how to update your Amazon Fire Stick if you want your device to perform optimally. By installing the latest software, you can also get fixes that prevent apps from crashing or removing features that were added incorrectly in earlier versions. While Amazon Fire TV devices install these updates automatically, you also have the option to do a manual installation. Since Amazon rolls out new software versions almost every month, it's a good idea to proactively check for updates and manually install them. To do this is pretty simple. Just follow the steps below. Go to Settings. This will be the last option in the menu bar at the top of the Start screen. Select My Brand TV. You will need to scroll right to find this option. If you have an older Fire Stick, it may be labeled as Device or System instead. Select About. Choose either Check for Updates or Install Update. If your device is up to date, Check for update appears. If an update is available, install update appears. You'll also see a message on the right side of the panel that says the update will automatically begin the next time your Amazon Fire TV is idle. It will also tell you that you need to restart your system to install the update. On the remote control, tap Select. When you do this, the TV turns off. Wait for the updates to be installed. You will see a message on the screen that says that your device is installing the software. Warning: Do not remove the power cable during the update. Installing the update takes from 5-15 minutes, depending on your Internet connection. Updating the software helps resolve error messages on your four-TV device. If you're still experiencing problems, you can learn how to pair your Fire Stick with our previous article here.
