## Vpn tether pro apk

APK Downloader App Tool VPN Tether (Shared VPN Connection) 20200709 20200709 / July 10, 2020 cloud\_download Download APK File (4.2 MB) Description Share VPN connection via hotspot using iptables or http proxy. Important: The default is to use iptables and require a route to set iptables. User Guide: Note: As of Android 9 (Lineage OS 16), the IP address of wifi hotspots is no longer fixed at 192.168.43.1. Every time a hotspot is turned on, a new (obviously) random one is used. In effect, this means that the procedure will no longer work. To work with Android 9, you need to find the IP address of the hotspot and change the default gateway of all devices connected to the hotspot to that IP address. No Internet connection? The crux of the problem is that VPN tethering devices do not provide proper IP information to client devices when connecting. However, these client devices can be configured manually with static IP addresses, gateways, and, if necessary, DNS. Root mode is completely free. Root mode does not require payment, your payment will be appreciated and guarantee the future development of vpn tether. Privacy Policy: Note: Sometimes order processing is delayed. You can try it later, reinstall it, or send me an order ID for a refund. If you have any questions, please contact us. Emails will be responded to within 72 hours. Thank you for your support! app info VPN tether (shared VPN connection) VPN tether (shared VPN connection) version history VPN tether (shared VPN connection) Select the version: VPN tether (shared VPN connection) 20200709 Share VPN connection through hotspot using APK iptables or http proxy. Join us at facebook.com/360safecenter Google Plus community: Deleter recovers files and data and deletes files from memory card \*jalbreak/root/ Without access, Undeleter can only scan appcache for images. Read on for information about the route. For free, the app restores all supported image file types and all types of data, including SMS, call logs, WhatsApp and Viber conversations. It also shreds the deletion and removes it safely. Unlock, remove ads and enable background scanning to recover other supported file types. \*ROOT/SUPERUSER PERMISSIONS requires you to change the operating system on your device, you should visit this website for more information: cache may contain images that you would not others find: a poor quality copy of an image that you have shared on social media but you have never opened or deleted in the past. It may also contain images preloaded by your browser or other apps on your device - even images of people you don't know. You can exclude them using Hide Existing Files. File type: Journal scan can detect files with possible extensions. Basically, these files remain on your volume with the assigned sector data. Journal scans are only available on EXT4 and derived file systems. Deep Scan scans and recovers the following types of files: JPEG/JPG, PNG, MNG, JNG, GIF, MP4, AVI, MKV, MP3, OGG, OGM, WAV, FLAC, AMR, MP4A, PDF, SXD, SXI, SXC, SXW, ODT, ODG, ODS, ODP, ODCX, XLSX, PPTX, ZIP, JAR, APK, EPUB. Data Scan is available in a selected number of apps.System phone and SMS applications. Because third-party catalogs cannot be merged, data is recovered in WhatsApp and Viber formats or HTML files. Shred/Secure Delete: Files in free disk space can be completely erased in bulk using the Shred function. You can also use the system-wide sharing menu to safely erase files through other apps, such as opening a gallery. Select a large number of images and choose the secure delete.ACCOUNT required for Google Drive and Dropbox upload CALL/SMS - Required for app data scanners - Deleted SMS and call log locations - Ad Security Master - Antivirus, VPN, AppLock, Booster APK Original CM Security has upgraded to an entirely new security master Antivirus & VPN (CM, Cheetah Mobile), redefining the scalp of phone security. Instead of introducing intelligent diagnostics introduced by Security Master Antivirus & VPN (CM) to inform you of the solutions you need, including antivirus, junk clean, and phone boosters (battery saver, CPU cooler), in addition, SafeConnect VPN. ★ By creating a shield of all your online activities through SafeConnect VPNSecurity Master Antivirus & VPN (by CM), you will increase your privacy protection and present you with the easiest to use free VPN, proxy & unblocking solution. Aside from other VPNs, SafeConnect VPN partnered with Hotspot Shield Free VPN Proxy and was designed for everyone. SafeConnect VPN establishes a secure cyber environment because it requires hackers to be blocked. SafeConnect VPN allows you to apply virtual locations for added security and free access to your favorite content. Security MasterAntivirus & VPN (cm) now provides protection for online data transmission to prevent leakage of online banking information, private messages, and browsing history, as well as your device. Our famous big button design ★ (coming soon worldwide) has been upgraded to intelligently diagnose your most needed solutions. All solutions keep your phone safe, clean and optimized like a new one including a battery. Antivirus - Security Master Antivirus & VPN (by CM) is equipped with a certified #1 antivirus engine. Detect 100% of viruses & malware with customized scans and remove viruses & malware. It protects your phone and personal information from malware, spyware, and hackers. Junk Clean - The phone automatically stores junk files from time to time. Security Master Antivirus & VPN (by CM) detects this issue and frees up storage if necessary. One tap to clean cache & junk files at once. The smartest way to clean and optimize your phone. Your phone can't have the best performance if it stays hot or high memory usage - phone boost, battery saver, CPU cooler. Look at your phone and battery to keep your phone cool and fast, especially when you charge the battery and play games.More battery life - ★ message security worry about others peeking at your message notifications? Security Master Antivirus & VPN (by CM) hides notifications in a timely manner to protect your privacy by message security. It collects all chat notifications in one and makes them easy to read & manage.★AppLock Security Master Antivirus & VPN (by CM) protects the privacy of apps by AppLock. You can lock bluetooth & Wi-Fi switches, incoming calls, recent apps, settings, photos, WhatsApp, or whatever you need to protect, such as apps of your choice. In addition, notification previews can be locked so that no one can see who you are using or chatting with. Applock allows you to lock apps with patterns, PIN codes, or fingerprints. Fingerprint lock is supported by Samsung or Androiddevices 6.0 or higher, which is equipped with a fingerprint sensor. You can also customize the re-lock time so that you don't have to unlock it every time you launch the app by re-locking it when your device screens off. Intruder Selfie - Security Master Antivirus & VPN (by CM) protects app privacy from snoopers. If someone tries to unlock your app with the wrong password, the intruder's photo will be taken automatically and an intruder alert will be sent to you via email. It keeps your phone safe and even tells you who the intruder is. Impersonation Cover - Security Master Antivirus & VPN (by CM) disguises the display lock screen so that no one is aware that you are using AppLock while keeping your secrets and privacy safe. You can protect your privacy without your parents, partners, or children knowing. Themes - You can choose the lock screen style from hundreds of AppLock themes or customize it with your photos. Color status bar 0.7.7 APK application status bar decoration. Decorate as the color or shape you want. A new world is coming.\* No root required! Support: positioned as a color mixing and change center clock. Displays the percentage of the battery. The update will continue! You.
