Small silver balls earrings

Teapot your grandmother gave you, a vintage dish picked up in the flea market, your special occasion cutlery- your silver pieces are often some of the most treasured in your closets. That is why it is so important to take care of them properly. Here's everything you need to know to make your silver look good as new. ChippingIt with any delicate table, you should gently hand wash silver with unscented phosphates without dishwashing detergent after using it. While washing, it prevents silver from coming into contact with a metal sink that can cause scratching, says Jeffrey Herman, Herman Silver Restoration & Conservation in West Warwick, Rhode Island.PolishingHand-polishing owner is the best way to go, using a quick chemical dip or machine can dull or seriously damage the finish, says Jeanne Sloane, vice president of Christie's in New York. First, put on a pair of cotton gloves, as fingerprints can make blackening worse. Rub a little abrasive, low ammonia liquid or paste polish, like a 3M Tarni-Shield Silver Polish, on a piece with cotton balls or sponge that comes with the product. Wash all traces of polish with warm water, make sure that there is nothing left in the cracks, then dry the piece with a soft cotton cloth. StorageThe main culprit for blackened silver is the effect of the air, so wrap the silver cloth and place it in a sealed plastic bag until it is needed. Cover the table individually and arrange each piece side by side, says Herman. For best results, use treated flannel, such as Pacific Silvercloth, or non-buffered acid-free wrapping paper (felt or cotton fabric will also work). Just avoid plastic wrapping or rubber bands, which can cause a color that is difficult to remove. Karl Jeungel/Studio D Some of the most beautiful records of human endeavors were sterling silver trophy cups Silver is a fabulous way to bring light to the room without hitting you over your head. It's all about levity-it adds lightness, but it can also give an upbeat, tongue-in-cheek feeling. Silver has a chameleon quality; because it picks up and reflects what is around him, silver can be subtle because it can be glitzy. In city apartments with great views, I would like to hang simple silver Lurex window panels. The panels frame the image and make the city seem to glow day and night.-Brett Beldock, designer of Make Light work on computer tasks with the mouse bedecked sparkling Swarovski crystals, from Neiman Marcus (\$100). Ralph Lauren Iron Gate Benjamin Moore Silver Behr Metallic Silver #743 Who Knew? 1. Colonial American women saved silver paper, in which loose tea was wrapped and used leaves to cover the ceiling of their home. These tea paper ceilings reflect light lighten the interior. 2. During World War II, strips of silver foil, known as chaff, were dropped from Allied planes to mislead german Germans Scanners. British wallpaper company Graham & Brown, hampered by the lack of postwar paper, reinvented the remaining chaff as wallpaper and silver became fashionable in the color of the mid-century walls. 3. Since silver does not corrosively, it is the metal of choice for electrical circuits and it can be found in almost every apparatus in your home. A typical washing machine alone needs 16 silver parts. Do not intimidate metal quality silver - its glow is warm and not cold, and it can be used like any other gray (mix with creams and blues softer look or white or black more modern). Silver is an integral part of a broad spectrum of style; it's a useful way to unify periods in one space.-Tim Clarke, designer of Dauphine, a handheld screen of stylized floral wallpaper from flavor paper, comes in 27-inch-wide, 15-foot rolls, here's silver on chrome (\$150). McGuire's classic butterfly chair, designed by Rattan's Edward Tuttle, gets silver leaf treatment, one of dozens of finishes available (35 h to 321/2w to 21d, \$2,905). Denis Santachiara's Vitesse bar stool, a polished aluminum screw, adjusts from 19 to 28 inches (14 inches in diameter, about \$840). Western Elm Painted Ceramic Silver Bubble Lamp is an affordable interpretation of expensive mercury glass lamps that are made of silver leaves (\$129). Designer Michael Aram's botanical stem with leaves, a 21-inch polished aluminum dish, adds stylish shine in organic form (\$95). With its Asian-inspired model and silvery brilliance, JAB Tuvatu (a 55-inch wide viscose blend, through designers) is woeful glamour. Earrings can catch and accumulate a layer of fat, dirt, sweat and shampoo, as well as other hair and skin products. This buildup can cause your earrings to lose your shine and even irritate the skin around the earrings, increasing the risk of infection. But don't worry! There are many quick and easy ways to get your earrings disinfected and shimmering again. Diamonds are elastic, but you still want to be careful when cleaning them to avoid discoloration. Believe it or not, mild dish soap gets the job done. Steps: Soak your diamond earrings in a gentle dish of soap and water for about 30 minutes. When they have finished soaking, gently wipe them with a soft toothbrush. Rinse them with water and let them dry with air or gently dry them with a lint-free cloth. Important: If you work sinks, do not forget to connect the sink to lose the piercing down the drain. Jessica D'Amico, jewelry designer designer owner lady j+1, recommends this DIY treatment to remove oxidation, or only silver metal color. What you need: baking sodaa soft brushboiling water tinfoilSteps: Line a glass dish with tinfoil. Generously cloaked her silver earrings with soda. Boil the water and pour it over your jewelry. Use only enough to create paste consistency. Using a soft brush, such as a brush or soft toothbrush, gently scrub jewelry to help loosen dirt and oxides. Repeat until silver sequins. After finishing, rinse with hot water and dry with a soft cotton cloth. Important: Keep all stones separate. This method of cleaning is not recommended for gemstones, especially opals, pearls or amber. They are porous and soft, so using this method can spoil them. Like diamonds, gold earrings can be cleaned using only mild dish soap and water. Steps: Soak your gold earrings in dish soap and water for about 30 minutes. Gently wipe them with a soft toothbrush. Dry thoroughly and gently with a cloth without lint. To lift dirt, oil and dirt from golden earrings, you can also soak them by rubbing alcohol for a few minutes. It is best suited for simple pieces. Avoid this method if your gold earrings use glue to keep stones in place. Alcohol can melt glue. Pearls are very brittle and require only a few gentle steps to effectively house cleaning, says Jess Hannah, designer and founder of J. Hannah and Ceremony. According to Hannah, it is best just to use soft cotton fabric to remove traces of cosmetics or other residues. If you want to add some water to cleaning pearls, consider doing the following simple steps:Gently wipe the pearls with a damp cloth. Using a clean, dry cloth, gently pat the earrings to get rid of the remaining water. Let the earrings sit dry for about 30 minutes. Store them in a dry, safe place. Hannah also says that pearls are best to avoid ultrasonic cleaners or chemicals that are constantly used to clean gold, silver, and other metals. D'Amico says jewelry polishing cloths are best for quick getting rid of blackening. I highly recommend sunshine polishing fabrics of silver, gold or platinum, she says. They even come in different finishes. Sunshine polishing fabrics are not well covered with jewelry, but they can remove plating, D'Amico explains. It's been said most people don't know that their jewelry can be replated! If you have vermeil jewelry, which is gold plating over silver, it can be replated by a jeweler. I often compare this to getting your shoes resold. Approximately every 3 years you should take the redistribution of your jewelry. Buy Sunshine Polishing Cloths Online. Even earrings can become dirty and cause infection. D'Amico recommends cleaning earrings, especially piercing records, as often as If you can manage to take an alcohol swab to the post or hook before each wear, D'Amico says, it will help build up and keep your pierced ears healthy. If you have just gotten your ears pierced, it is best not to clean them. The American Academy of Dermatology (AAD) recommends storing earrings for 6 weeks or more after piercing, even at night. Premature removal of piercings from new earrings can lead to the closure of piercings. Nevertheless, you should still clean your new earrings and pierce the earring every day. AAD offers to wash your ears with soap and water daily, as well as using a cotton ball dipped in rubbing alcohol twice a day to prevent infection. Be sure to keep up with the maintenance instructions and cleaning solution your piercer sends home with you. According to D'Amico, there are some tried and true ways to keep your earrings (and all other jewelry) shining. When you don't wear them, keep the earrings sealed in sealed bags. The air can oxidize metals, such as silver and brass, causing discoloration or blackening. Avoid working or cleaning your home with your earrings. Sweat can change the color of metal and mix with any lotions or hair products that you already have, which also negatively affects the metal. The chemicals you use to clean your home can slowly reduce the quality of metals and destroy expensive gems, says D'Amico. Avoid swimming with your earrings. Over time, chlorine and saltwater can cause the disintegration of alloys. There are many simple ways to safely clean your earrings at home. It is best to clean the earrings as often as possible to avoid infection and they look like new ones. Careful to store them also helps to avoid the buildup of grime and color. Color.
