Comics Response Professor Oak, Orc Professor Samuel Oak (Japanese: Dr. Yukinari Okido博) is a Pokémon professor who lives and works in his lab in Palette Town in the Kanto area. According to Professor Elm, orcs are a profession that focuses on pokemon and human relationships. In the core series, the unused trainer class for Generation I Professor Oak works with his aides in his lab in Pallet town. He gave red and blue the first Pokémon in Pokémon Red, Blue, Green, Yellow, Firered, and Leafgreens. He is an idol to many trainers and researchers, including Professor Elm, and always plays an important supporting role in many of the games he starred in. He was Agatha's childhood friend. They maintained good friends and top-notch Pokémon trainers until the orcs stopped fighting and became interested in Pokémon research. Agatha said he became soft and began to see him as a fool. However, orcs still belong to the Pokémon League and advisors. In Pokémon Masters EX, her synchrony pair talk with Agatha for a day, and Agatha explains how she and the orc met. Orcs were always kind and open as children, talking to Agatha and trying to help her. He was just trying to be nice, but still angry because she wanted to remain alone with Agatha. Agatha went to fight the Orcs and tried to run away, but he was always better than her, so I'll fight him again. At last, the time they spent together A lot to Agatha. As a result, when the orcs got the idea to invent Pokémon, Agatha felt betrayed. In their Pokemon Master EX synchron synchrony pair story, a day with Professor Oak, Professor Oak reveals that his trusted Pokemon partner is Nidolino. Pokemon Red, Green and Blue confirmed that Professor Oak became a successful trainer in his youth; However, he says he only has the following Pokémon. Red can choose one to start your own journey. Yellow Main Article: Red's Pikachu (Game) Professor Orcs catch this Pikachu while stopping Red from starting his journey without any Pokémon. He later decides to give it to him. This Eve was for Red, but Blue shot with prematureness. The evolutionary path is determined by the player's interaction with the trainer. In unused Team I generation games, there is unused trainer data for Professor Oak. This means that the player has to fight him at some point in the game. In the data, orcs have level 66 tauros, level 67 actuators, level 68 arcanine, level 70 Gyarados, and one of the Level 69 Ganto starters. This deploys his power at 1 level than the player's rivals and Pokémon League champions. In addition, his Pokemon is the same as the one used by the four champions, only at a high level, meaning that he will be the original champion, or at least another senior trainer. This is supported by an email to the PC from Oak's lab, in which Pokemon League issues challenges to all trainers and specifically asks the orcs to visit them. Orcs can fight by performing ditto defects with a special statistic of 226, or by performing MN and senior defects as characters in the 3, 5 or 7 slots of a player's name. This team can not fight when using elder defects. You can only fight through ditto flaws when Wild Ditto's attacks are lowered to tiers 4, 5, and 6 (each generates a different team out of three).
