Integers word problems worksheets with answers

Problems with whole words with answers - Show the first 8 worksheets found for this concept. Some of the worksheets for this concept are Word problems with integers, Integers working with pdf response key, Integers working with answers, integers consecutive word problems answers, Grade 6 integerwork, Decrease of integers, Accelerate math chapter 2, Mathematics review package. Have you found the worksheet you're looking for? To download/print, click the pop-out icon or print icon on the worksheet to print or download. The worksheet will open in a new window. You can download or print using your browser's document reader options. Displaying top 8 worksheets found for - Word Integers Problems with Answers.Some of the worksheets for this concept are word problems with integers, 7th grade math word problems and answers, Decrease in integers, Add and subtract integer numbers word answer problems, Accelerated Math Chapter 2, Mathematics package review, 501 math word problems, Multi step equations. Have you found the worksheet you're looking for? To download/print, click the pop-out icon or print icon on the worksheet to print or download. The worksheet will open in a new window. You can download or print using your browser's document reader options. So we need the sequence from smaller to larger, so that you start from the far left point and move to the point on the right. Write the number in the same sequence in which they appear. Write a positive or negative integer for each situation. David climbs a mountain 460 meters above sea level. Write a positive or negative integer for each situation. Continue the sequence of numbers for six more numbers. Find a number that is. Students will order positive and negative numbers from lowest to highest. Three problems are foreseen. Find three consecutive numbers whose sum is 48. Find the whole one that follows the given condition. Three times an increased number of four is the same as the number plus ten. The sum of two consecutive numbers is 27. What are the two numbers? Which four consecutive numbers have a sum of 70? One number is twice another. If 12 is subtracted from the higher number the result is 7 higher than the smaller number. Find the numbers eight times a number is increased by 9 is 15 more than 7 times the number. Find the number. There are two ways to get from 20 to 38 and vice versa using plus or vice versa. What are these? Name 2 numbers whose product is less than zero and whose sum is -25. There are two ways to get from 13 and 38 vice versa using plus or vice versa. What are these? Give 2 numbers whose product is less than zero and the sum of which is -12. There are two ways to get from 41 and 58 and vice versa using plus or vice versa. What are these? Give 2 numbers whose product is less than zero and the sum of which is -30. There are two ways to get from 30 and 42 using plus or vice versa. What are these? There are two ways to get from 6 and 14 14 add or reverse it. What are these? There are two ways to get from 12 and 24 using plus or vice versa. What are these? There are two ways to get from 40 and 50 using plus or vice versa. What are these? There are two ways to get from 7 and 18 using plus or vice versa. What are these? There are two ways to get from 6 and using plus or vice versa. What are these? Represent the integer statement. The stock market rose 789 points today. Represents the statement with numbers. The stock market rose 789 points today. Represents the instructions with integers. Write thirty-nine meters above the bottom of the building as a whole. The smallest number between 29 and 60. The stock market rose 999 points today. Represents the instructions with integers. Students will translate written statements into words into phrases using integers. would be: The footballer had a gain of 50 meters per game. I like this: seventy-nine meters below sea level. The footballer had a 32-metre win on the pitch. The footballer had a 70-year win in the game. Represents the instructions with integers: The opposite of -21.250 Here is a graphic preview for all entire worksheets. You can select different variables to customize these entire worksheets for your needs. Entire worksheets are randomly created and will never be repeated, so you have an endless offer of entire quality worksheets to use in your classroom or at home. Our entire work sheets are free to download, easy to use and very flexible. These entire worksheets are a great resource for children in kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade, and 5th grade. Click here for a detailed description of all entire worksheets. Click the picture to take to the number worksheet. Representation of whole worksheets These entire worksheets will cause word problems for students to identify the entire representation in the instruction. Absolute value of integer worksheets These whole worksheets can be configured for 1- or 2-digit problems about the absolute value of integers. Values opposite to whole worksheets These whole worksheets can be configured for 1- or 2-digit problems about the opposite value of integers. One Less & One More Integers Worksheets These entire worksheets will cause problems in which the student will complete the table with one less and one more of the entire listed. Comparing entire worksheets These entire worksheets will dynamically cause problems based on selections. You can select 1, although 6 digits, you can use numbers from the range 1 to 20 or you can randomly generate problems with mixed digits based on You can select positive, negative or mixed-sign problems. Largest/Smallest integer worksheets These whole worksheets will cause problems with 4 integers will encircle the largest or smallest integer. Arranging whole-sheet orders These entire worksheets will cause problems with 4 different integers, and the student will arrange the integers either in ascending or descending order. Ordering integer worksheets These whole worksheets will cause problems ordering 4 integers. You can select the four numbers to have the same number of digits, or you can produce four integers with different numbers of digits. You can select between 3 and 6 digits for problems. You can select the order of problems from highest to smallest, least to highest, or both. 1 or 2 Plus Figures - 2 Entire Worksheet Terms These entire worksheets can be configured for 1 or 2 digits of horizontal 2-term add problems. Terms can be selected for positive, negative, or mixed signs. 1 or 2 Figures Plus - 3 Entire Terms Worksheets These entire worksheets can be configured for 1 or 2 digits of horizontal 3-term addition problems. Terms can be selected for positive, negative, or mixed signs. 1 or 2 Plus Figures - 4 Entire Worksheet Terms These entire worksheets can be configured for 1 or 2 digits of 4-term horizontal addition problems. Terms can be selected for positive, negative, or mixed signs. 1 or 2 Integer Decrease Figures Worksheets These entire worksheets can be configured for either single-digit or multi-digit horizontal subtraction problems, with numbers being positive, negative, or mixed signs. 1 or 2 Numbers Multiply Integers Worksheets These entire worksheets can be configured for either single-digit or multi-digit horizontal multiplication problems, with numbers being positive, negative, or mixed signs. 1 or 2 digits Division entire Worksheets These entire worksheets can be configured for horizontal division problems with one or more digits, the numbers being positive, negative, or mixed signs. 1 or 2 digits mixed problems integer worksheets These entire worksheets can be configured for either single or multiple horizontal mixed problems for adding, subtracting, multiplying, and splitting. Directions: Read each question below. Click once in a response box and type the answer; then click ENTER. After you click ENTER, a message will appear in the RESULTS case to indicate whether the response is correct or incorrect. To start again, click CLEAR. Each answer should be given as a positive or negative whole. Do not enter commas in responses. Suggestions: Always double-check the response sign. Does it make sense to the problem? When you decrease integers, make sure that you decrease the smaller integer of the entire Great. The whole smaller integer is further to the left on the numeric line. 1. Mount Everest, the highest altitude in Asia, is 29,028 meters above sea level. Dead Sea, lowest altitude, altitude, 1312 feet below sea level. What is the difference between these two elevations? 2. In Buffalo, New York, the temperature was -14°F in the morning. If the temperature has dropped 7°F, what is the temperature now? 3. A submarine was located 800 metres below sea level. If he climbs 250 feet, what's his new position? 4. Maggie owes the candy store \$35. Each of the 5 friends will help her pay off her debt. How much will each friend pay? 5. The Roman civilization began in 509.C i.Hr. and ended in 476 d.Hr. How long did the Roman civilization last? 6. Lilly bought 4 pairs of blue jeans at \$32 each. How much money did he pay the clerk? 7. A submarine was located 450 metres below sea level. If he drops 300 feet, what's his new position? 8. In the Sahara desert one day it was 136 °F. A temperature of -50°F was recorded in the Gobi Desert. What is the difference between these two temperatures? 9. The Punic Wars began in 264.C and ended in 146 BC.C. How long did the Punic wars last? 10. Metallic mercury at room temperature is a liquid. Its melting point is -39°C. The freezing point of alcohol is 114°C. How hot is the melting point of mercury than the freezing point of alcohol? Alcohol?
