[Not enough listings to build a price history chart] Given the fact that the 2013 Scarlet Spider Marvel Legines character has been in the headlines for this site ever since he opened it more than half a decade ago, I don't think anyone will be stunned to learn that I'm a big fan of Kaine Parker. While that ML Rocket Raccoon Series drawing is a bit outdated by today's standards, I loved (and still love) it. But time marched forward, the figurines moved forward and it was time for a new version of Kaine to be released. Marvel Legends SP//DR Scarlet Spider is already selling out and more expensive: is it worth upgrading before it's too late? Right: Although we just got the first ever 6Scarlet Spider Marvel Legends character Kaine Parker in the fifth wave of Hasbro (Return of) Marvel Legends back in 2013, the character has exploded in notoriety and popularity since and has become a modern eternal staple in the Spider-Man comics family. As a result, the old figurine was highly sought after, and the new Scarlet Spider was much needed. As part of this fall's SP//DR Series, we have this new Marvel Legends Scarlet Spider character, but is it improving? Well, to be honest: yes. How do I love this original version, is better in virtually every way. Together with the Looking more authentic and realistic, this new Kaine Scarlet Spider Legends data adds butterfly rotating arms that are all the rage these days. These joints themselves make a huge difference in the number of upper body poses that can be achieved, and combine wonderfully with improved proportions. The complete articulation scheme consists of a ball hinge head; shoulders on ball hinges with butterfly swips; hips of beads; ab crunch; rotating thighs/biceps/waist/shoes; elbows and knees on double hinges; rotating and hinged wrists and hinged ankles with rockers. As far as I am concerned, every necessary articulation base has been covered here. In addition, Kaine has three newly sculpted parts: a pair of hands with stings coming out of the forearms and a new head. With this new head sculpting, it's grossly clear that Kaine Parker is a pissed-off, hostile neighborhood of Spider-Man. Love the angry, slightly asymmetrical eyes on him! Meanwhile, the sting's arms look downright deadly and are something quite unique to Kaine Spider-Man's iterations. While I'm frustrated by some of the missing hands this character has (more at this point), the venomous stinger's hands are bursting to pose and have fun. Wicked. Painting wise, this 6Scarlet Spider character is close to ideal. Everything on the front is perfection, and on the back there is only the smallest dot of additional black paint on the red top. The two-color color of this character is the coolest part of the design, and Hasbro fortunately keeps these colors looking clean and well painted on this figure. Two additional accessories are included: Clone Conspiracy Unmasked Head (which I won't discuss further in Right) and SP//Dr Build-A-Arm Drawing. I reviewed SP//dr earlier this month and found it oodles fun, and I think it will ultimately be the most expensive character that is filled with part of the BAF for the robot. If you need this arm, I would recommend getting it now, while the prices are not out of control yet. The Wrong: Since Kaine Scarlet Spider is one of my favorite iterations of Spider-Man, I had sky-high expectations for this character. And while the basic character itself largely meets these expectations, some interchangeable parts — both included and not included — disappoint me. On the hands in front, it's the fact that Marvel Legends Kaine comes only with fists and hands from his bones like an extended sting. Apparently it is Spidey who can not shoot ribbons, crawl the walls or capture anything. I mean, if ever there was a Spider-Man with the temperament of just punching things or stabbing people, it would be Kaine. Still, we know that instrumentation already exists to shoot the internet and grab hands for this form, so not including such small additions to a character who may not be back for years feels a little stingy. Furthermore, I believe that Kaine Parker's portrait of The Clone Conspiracy is monumental waste. Kaine appears in dozens of contemporary comics with a mask off, so it was with a huge wing that I saw Hasbro chose a plot-specific unmasked Scarlet Spider head that literally almost no one would use as a pack-in. It's an ugly head, which was a bizarre choice. Overall: As a whole, I'm very happy with this 2018 Marvel Legends Scarlet Spider figure. Aggro's masked head is loaded with personality, and I love to get updated body forms with butterfly rotating arms. The paint quality is excellent, the joints are tight... The basic figure is gold (not literally), I really would appreciate some proper open hands and web-shooter hands to match Kaine's Scarlet Spider costume, and the absence of not dying an unmasked head is a real head-scratcher (no pun intended). Otherwise, this 6Scarlet Spider character is the winner. Post review: Marvel Legends Scarlet Spider 6 Figure (SP//DR Series) first appeared in Marvel Toy News. Left: Scarlet Spider (SP//DR Baf Wave) Right: Scarlet Spider (Rocket Raccoon BAF Wave) Here we have the Scarlet Spider from SP//DR BAF Wave (2018) and Rocket Raccoon BAF Wave (2013). RR Scarlet Spider uses a body form that is widely used during these few years. The first Big Time Spider-man and Future Foundation Spider-man uses the same body form. SP//DR Scarlet Spider uses the new form of the Bullseye body. It is slightly more polished and has updated butterfly shoulder joints. Left: Scarlet Spider (SP//DR Baf Wave) Right: Scarlet Spider (Rocket Raccoon BAF Wave) SP//DR Scarlet Spider had 2 pairs of hands and an unmasked head, while RR Scarlet Spider has no other accessories, not even part BAF Rocket Raccoon. You can see from the above front and back pictures of the two characters on the spider logo on the front and back different from each other. Differences Left: Scarlet Spider (SP//DR Baf Wave) Right: Scarlet Spider (Rocket Raccoon BAF Wave) Eyes on two Scarlet Spiders are different. I prefer RR Scarlet Spider eyes. Left: Scarlet Spider (SP//DR Baf Wave) Right: Scarlet Spider (Rocket Raccoon BAF Wave) The main problem with the body form of RR Scarlet Spider (a problem that big time spidey and Future Foundation Spidey also have because they have the same body form) is the elongated fist and hands for shooting on the internet. Above you can see that the RR Scarlet Spider fist is elongated from the wrist side compared to the SP//DR Scarlet Spider. Above: Scarlet Spider (Rocket Raccoon BAF Wave) In the photo above you can see an elongated hand for shooting on the internet. It's pretty ugly for me. Back: Scarlet Spider (SP//DR Baf Wave) Front:Scarlet Spider (Rocket Raccoon BAF Wave) Articulation points are almost the same except for the RR Scarlet Spider ball connection. This resembling a ball, which Legs to hips allows RR Scarlet Spider to make an almost perfect split. However, I feel that the newer SP//DR Scarlet Spider is easier to pose. Hasbro moved from those balls like a leg to a hip joint. Above: Scarlet Spider (SP//DR Baf Wave) Above is a SP//DR Scarlet Spider with an unmasked head. In the comics, the true identity of this Scarlet Spider is Kaine, who is an imperfect clone of Peter Parker, the original Spider-man. It turned out that he merged with the mystical subject Of The Other during the Spider-Island storyline, and so they have these stings on his alternate hands for this character (although the stings were longer). TL:DR Scarlet Spider (SP//DR BAF Wave); + Updated body form + Smaller eyes + Unmasked head + 2 pairs of hands + Different Scarlet Spider logo (Rocket Raccoon BAF Wave): + Bigger eyes + Other spider logo - Only one pair of hands - No alternative head - Elongated fist and hands for shooting on the internet My Verdict Left: Scarlet Spider (SP//DR Baf Wave) Right:Scarlet Spider (Rocket Raccoon BAF Wave) The newer Scarlet Spider is definitely a win for me. An extra pair of hands, an unmasked head and an updated body form is what this character needed. However, I still prefer the head of RR Scarlet Spider. I like classic big eyes. SP//DR Scarlet Spider can still be found in stores or online, and both can be found on the aftermarket. If you plan to get one, SP//DR Scarlet Spider is the character to go in my opinion. You can get SP//DR Scarlet Spider here or here. I keep both of course. Just because it's spider-man related. Heh. Do drop the comment below! Below!
