A virtual horse wiki

Use the yellow box above to type a keyword in search of A Virtual Horse is a horse game shaped like a virtual town where players can raise and train horses, work and compete in programs. Registration To play the game, one must have an email address, which will be verified as valid. This email address will be used to sign in to the game, once the registration process is complete. To play the game, one must register a game account, a process that requires the person who wants to play the game, choose a horse to start with, select the player name and enter login details. Once registered, the user will be logged into the game and can start playing. Description: The game is a complex game and understand it seems a bit overwhelming at first, which is why new players should have simple goals, like learning to advance to a level, or where to buy a horse. Here are some things to remember: Your horse is in your stable. You can buy and sell everything in trade. You can send mail at the post office. The fastest way to raise the level, is to enter your horse in the show. What to do Different players have different objectives, but the original goal for all new players should be to slowly learn the game, while raising the level. It may not be too exciting at first to join the program, but it helps to learn how things work and the progressive levels that open up features in the game. Note Players are members of guilds, they can chat or blog, they can have playing partners or friends. There are often - non-magical horses, like Arabic or Friesian and magical horse breeds like Unicorn and Pegasus. Links: Players, Horses, Parents, Credits, Programs, Guilds, Accounts, Jobs, Extra's and Formulas, Walkthrough Is a horse game, almost everything is about virtual horses that players can raise, equish and display. There are regular horses and magical horses. All breeds have a certain color and when the horse breeds, the color of the foal is created through the means of austrian genetics. Regular horse breeds More than 100 of the most popular horse breeds are present in the game and players can choose which breed they want to breed. On AVH there are 3 types that these breeds have been divided by: Magical Horse Breeds Magic Horses are not real-life breeds, they are either mythical breeds, such as Unicorns, or are made up of varieties, such as Ponypeg or Winged Zebra. Link: Guide, Video tutorial From DominionStrategy Wiki Poor House, a virtual money card. Cryptocurrencies, also known as virtual currencies, refer to an Action card that provides purchasing power. Non-terminal virtual currency action classified as cantrip money or disappearing money based on whether they provide +Cards. Terminal virtual-coin Action almost never offers +Cards. Come on, let's go. - Poor House offers good purchasing power in the floor without treasure, and poor house itself is a form of virtual currency. - Tactic strategists benefit from virtual coins played at the turn in which tactics are played; this strategy requires +Actions. First play the virtual money offer cards, and play Tactician as the ultimate action, remove the hand, before making a purchase. Dual tactical strategies often depend heavily on this. Countermediation - Virtual coin decks effectively fight pirate ships, as there are few or no targets for the Pirate Ship. We have to go. List of cards that offer virtual currency There is a large number of cards that offer virtual money. The italic tag has been deleted. Fate cards offer virtual money when they reveal either. In addition, from Menagerie it is possible to turn most terminal withdrawal cards into virtual currencies and vice versa. We have to go. The card does not provide [edit] Event [edit] How [edit] Costs 0-1 [edit] Cost 2 - one of its possible options - in Treasury [edit] Costs 3 - one possible option [edit] Cost 4 [edit] Cost 5 - in Treasury - in treasury - in Treasury - in Treasury [edit] Cost 6 + 6 +
