## Wanted student of beltrik

Last updated at 18 December 2020 Inherently, the seasoned traveler acts as a social butterfly. They can strike up a conversation on a whim and somehow manage to find common ground with individuals from all walks of life. Traveling on its own can be incredible eye opening and enriching, but it will also equip us with skills needed to be successful. Communication and interpersonal skills are attributes that can be learned and honed. These skills are applicable in everyday life and can be translated into professional environments. We are inherently closed Off For my first lonely travel experience, I had just arrived in San Francisco for an externship. There was a problem with our train and we had to switch to a new train on the next platform. A gentleman who had been making polite conversation decided that it was now his mission to help me move my stuff to the next train. Although well intentioned, I was appalled. I wasn't used to the kindness of strangers, in fact I thought he was trying to rob me or worse. Kindness is somewhat regional. And growing up in the tristate area, I was conditioned to be extremely skeptical. Interacting with strangers seemed incredibly taboo. It's embarrassing to admit, but social skills have fallen by the way. We've forgotten how to talk to each other. The idea of striking a conversation with a stranger is borderline terrifying. But even more frightening is that the lack of effective communication will eventually lead to a lonely life. Keeping the passion aliveA very wise man once said that before he fully commits to anyone, take them on a journey. This wise man is Bill Murray and he's telling the truth. Traveling can be a very vulnerable time for many, often times can bring out the worst in people. But if you are able to overcome the inevitable obstacles that will arise during your trip, travel has been proven to strengthen relationships. It gives yourself and your partner the chance to share in a common goal. Just in a different environment, free from all your daily obligations that tend to get in the way will help to rekindled romance and intimacy. It gives you both the chance to revisit some issues that would normally lead to an argument-in a safe, romantic environment. Couples who travel regularly together have reported having more effective communication with each other than those who do not. You will never see the world the same greatest revelation one can experience when immersing themselves in the travel lifestyle is the realization that not everyone thinks the way you do. Not everyone lives on way like you. Different cultures harbor different philosophies and priorities. Breathe, relax, enjoyGreeing in a place where results are expected immediately, I don't have to wait well. I mean, what's the stopping? I placed my order I want it now. Clearly impatience was smeared all over my face. The server that took my order once asked me so innocently: Why do you look upset? You have a few extra moments to just enjoy life before you get your food. He was right. Why did I get angry? I couldn't be anywhere. So I took his advice. I took a deep breath and took in all the beauty that surrounded me. Patience is a virtue. And when you're traveling, you have no choice but to be patient. Learning to roll with the punchesNot everything works as planned, things are bound to go wrong. When you travel, you are exceptionally vulnerable to these accidents, with very little safety if things happen to not go your way. This can be incredibly unnerving the first few times around. This may even deter some from deciding to proceed. But if you hack it and take the hits as they come, you will eventually develop the patience of the saint. Bad things are going to happen; Let them. You'll find another way. If it doesn't work out, you not only have to be patient, but also be adaptable. You should be able to remember and strategize, or at least accept the situation at hand and roll with it. It's not the situation- it's your reactionIn a landslide of positive effects, your increase in patience and adaptability will in turn make you a friendlier, less skeptical person. Because right now, you get it. We're all human beings, doing our best to make it. So stay calm. Conflicts will arise, and how you choose to treat them will determine the outcome. Alternative forms of communicationOnly that is new and unknown can seem terrifying. Especially when travelling abroad, especially if you are travelling alone. If you look like me, you're enjoying the slightly abrasive blow of the culture shock. Everything is so strange, so incredibly different. This can complicate communication. I literally don't speak their language. Chances are I won't be fluent overnight or sometime in the near future. But I can still lighten my struggle by learning a few important phrases in the language of where I am visiting to get through in everyday life. More likely than not, I will slaughter the verdict. The average person gets to the heart of what I'm trying to say and appreciate the effort-regardless of the poor execution. Nonverbal communication will be your saving grace. You develop the ability to convey your meaning without words. Without realizing it, you begin to mirror the behavior of the people around you to establish a basis of common ground. In this short time you evolve. You've picked up new mannerisms that look at your existing personality and habits This experience literally becomes a part of you, changing how you think and how you behave. Recommended photo credit: VideoHive via videohive.net No. find resources about taking test and study habits, understanding admission processes, plus guidance on how to deal with roommates, managing workloads and finding new extracurricular activities.
