Agri-fab 45-0492 lawn sweeper 44-inch

Ultimate Athens athenser.com City Guide for 2020 © 1996-2014, Amazon.com, Inc. or its subsidiaries If you are as tired of tear blades as we are, then maybe a new lawn sweeper is in your near future. These are really time saving and back-saving devices that make blade pickup fast and painless, but we had a little trouble finding a good one when we put out the search and figured you may encounter the same problems that we did. To make your search easier, we'll highlight the best lawn sweeper models in our guide below and give you a few helpful shopping tips that we picked up along the way. Top 10 Lawn Sweepers Ultimate TableTypes by Lawn Sweepers - Tow or Push? You have two main options when it comes to the type of lawn sweeper you can buy: one that is pulled or one that is pushed. Tow. These hook up behind your lawn tractor, so all you need to do is attach and drive. Of course, this is the most convenient choice and requires less energy on your behalf, but if you don't have a garden tractor, then your only other option is a manual push-sweeper. Push. With this type of lawnmower, you are the force behind the handlebars. The cleaning path is much narrower on a push sweeper than a drag sweeper, and the bag is usually smaller. While they are far more affordable and faster than manual raking, we still think the best lawn sweeper is a tow device simply because it's more convenient. Think of Bag Capacity if you have a lot of leaves to pick up, then a larger bag makes a lot more sense so you don't have to stop and empty as often. A large tow unit in a smaller yard, however, is overkill so just stick to a smaller push device to pick up the leaves you have. Take your specific yard debris into consideration as you act as well, because some sweepers can't handle the larger twigs and branches as well as others can. Top 3 Best Lawn Sweeper ReviewsThe only way to determine which is the best lawn sweeper for your leaf-cleaning needs is by trying one; But these are some of the top sweepers for those who have a lawn tractor. If you don't have a garden tractor and your only choice is a push model, we strongly recommend checking out the Agri-Fab 45-0218 Push Lawn Sweeper.1. Agri-Fab 45-0492 Lawn Sweeper We loved this lawn sweeper model from Agri-Fab and highly recommend it to any of you who are interested in buying a tow unit. For starters, the mesh funnel (bag) is huge - 25 cubic feet - and you can even offset the hitch to sweep and cut at the same time. Most other devices don't have this feature, and there's no need to tell you how much time you'll save by killing two birds with one stone! We really liked the one-handed empty function and how you can easily adjust the brush height settings to help you dirt closer to or farther away from the lawn. Has it wrong? Sure, you may run into a few problems over and use, but if you take good care of this machine from season to season, it will last. If you need a big sweeper for a giant farm, Agri-Fab's 45 model is awesome.2. Brinly STS-427LXH Tow Bag Lawn Sweeper Brinley's 42-inch lawn sweeper is a little smaller than the previous model, but if you don't need a giant of a product, then this is a big size. They give you a 20 cubic foot bag that you can empty from the tractor (no need to stand up and dump), plus there are six high speed brushes that you can adjust to different height settings based on the terrain you cover. Although it does a great job at picking up the leaves when it's all set up, we were a bit frustrated with the assembly instructions and found them not to be very clear. There is definitely a quality difference between this model and the previous one - Brinly is a bit below Agri-Fab - but it's still an affordable unit that will get the job done. Some of the parts seem a little flimsy, and we wonder how long they'll keep up (which makes us think that it might be a bit on the delicate side). This sweeper seems to require constant care and maintenance if you want to keep it working smoothly, so treat it carefully!3. Ohio 42SWP22 Sweeper Spiral Brush The final option is another tow model from Ohio Steel. We felt that in terms of quality, it was definitely a step above Brinly and comparable to the Argri-Fab model, and the good thing is that it costs less than the latter. It's heavy and it wasn't that easy to empty the basket with a pile of damp leaves in there, so we'd recommend emptying it more often instead of waiting for the bag to get full. There aren't many manufacturers that create this type of lawn care tool, but Ohio Steel did a pretty good job overall designing this one. We recommend it if the other two models don't sound like the right match!
